This is a collection of poems and short Sura from the Koran, which must be read as a means of protection and treatment from Black Magic, Jinn, Shayateen, witchcraft, Sir, witchcraft, evil eye and the like, as well as other harmful things. Shih Muhammad al-Kandalawi (may Allah pardon him) collected these verses in the form of a book that had already been used in his family as an antidote to witchcraft. This collection is popularly called Manzil. The collection has been recommended by the likes of Allama Shah Waliullah Dehlawi (May Allah pardon him) and Sheikh Muhammad zakaria al-Kandalawi (May Allah pardon him). It is recommended to just read it once in the morning and once in the evening. The elders were particularly punctual in reciting this from among other dua and formulas for protection and treatment. Special measures have been taken for children to commit this Manziel as a keepsake. Undoubtedly, the aya of the Koran and the dua mentioned in the Ahadiths is more effective useful than wearing ta'aweez. In the formula of these amalyaat (reading some aia and dua for a specific purpose), preference should be given to the Koran and the Ahadites. The noble leader of Ambiya, Muhammad (صلی اللہ علیہ وسلم), taught us du'a for every case of our religious and worldly needs, according to the experience of scholars recitating some Ayaat and Du'a for specific purposes has also been tested to be successful. Reading Manzil Dua has been confirmed to be extremely effective for protecting against the evil influences of Jinn, Sear (witchcraft, witchcraft, etc.) and other evils. These verses of the Koran were also mentioned with a slight change in the number of ayats, in the book of Al-Sawul Jamil, which also mentioned that there are these thirty-three ayas that ward off the consequences of Sir (witchcraft), and that they are a defense against shayatin (devils), thieves and harmful wild beasts. Whenever someone suggested reading these ayahs to the victim, they had to either point these verses in the relevant books or write them down, so it was felt that this would simplify the task if these ayahs were printed separately. This instruction is used to go to a16 as provided in the instructions. But since it is a conditional jump, it will happen if and only if the present value of the zero flag is 0. If the zero flag is 1, the program's flow continues sequentially. This is a 3-Byte instruction.
