Truecaller Premium Gold APK unlocked a modified version that allows us to use paid features for free. The latest updated version is completely error-free. Read our full article for more information. Does anyone remember an old-fashioned rotary phone where you had to spin your finger wheel over and over again until you were finally able to dial the number minutes later? Or old landline phones stuck on the walls of your house; so you couldn't move further around the room when the conversation gets too sharp for you to calm down? Or maybe you were raised at a time when mobile phones were buttons rather than the sleek touchpad of a smartphone that we are so used to and have grown to rely on for our survival. During their time and age, these old phone models were exciting wonders of the world that people couldn't hold their hands. However, they had one thing in common that set them apart from the modern smartphones that we adore so much. When the phone rang, we had no idea who was on the other line until we asked for ourselves. Well, for a mobile phone pad set, if the designated caller was saved in your contact list, there was no way on earth that you could guess the caller without answering the phone in the first place. Sometimes you answer the phone, and a timid voice asked you: Is your fridge working?, before they burst into laughter. Such were the good old days that also came with its limitations. However, with a modern smartphone, you can do a lot more with them than make a call. You can now identify subscribers before you even get a call using a specific call app for Android devices known as Truecaller Premium Gold APK. How we make and answer calls on our mobile phones has been revolutionized with apps like Truecaller Premium Gold, making it difficult for strangers to hide their identity around you. What is Truecaller Premium Gold APK? Truecaller Premium Gold APK is an advanced version of the original Truecaller app and allows access to premium Gold membership features. With over two hundred and fifty million users worldwide, Truecaller gives you amazing utilities and a wonderful experience when it comes to phone calls. The default call app on your phone has only a limited number of features, some of which may be considered outdated because you are not used to them or they don't matter on your phone and take up more of your space and RAM. However, since you can't remove the default call app on your Android device, you can always install Truecaller Premium Gold APK on it and enjoy a lot more with the call friends, family, colleagues, or even order pizza for the night with girls or boys. You can call, text messages and even video call your friends from all over the world to keep in touch as often as you want. There is a global global Set-up stations around the world allows you to connect with friends from anywhere in the world provided they have a stable internet connection. Calls can now show the IP of your contact list and let you know who might be on another call before you even dial their numbers and find them busy. You can also identify spam from the station and scams that other users have frequently reported. Any useless information, spam, anonymous SMS and remote SMS marketing will be immediately blocked until the smartphone reaches contact with Truecaller Premium Gold APK on your phone. You can even block different contacts that you don't want to bother you anymore and they will be prevented from contacting you completely. Truecaller Premium Gold APK is a default call and messaging app that identifies unknown subscribers, blocks unwanted calls, shows names and photos, or your subscribers even for those that aren't stored on your contact list. This is thus an app worth having on your Android device. To learn more about gold membership, please visit the official website from here. Info NameTruecaller Premium GoldVersion11.29.7Size45 MBModderSymos Last updated October 14, 2020 Download Truecaller Gold APK for Android Truecaller Premium Gold APK has unlocked all features of the original Truecaller app, and anyone can access them for free. There are also other versions such as the Truecaller mod APK, which only unlocks several premium Truecaller Premium features for free. All of these apps serve to exceed the expectations of the original version by discovering amazing features that are not available from any other call app on the Google Play Store. You can download the Truecaller app for free from the Play Store, but for different versions, such as the golden app, you'll have to pay for them. However, you are interested in the Pro version of Truecaller, you can always get them for free on our website such as apkfolks.com and install them on your Android device. There's no longer hiding for scammers, crooks and pranksters because Truecaller Premium Gold APK aims to expose them all, so you can be on the lookout at all times. Nothing sounds better than your ex trying to reach out to you using a new number, but since you have Truecaller Gold, you are instantly notified and thus able to block the number before they are called again. The app works for Android 4.4 and only has a size of about 46 MBs. Get the latest version of the Truecaller Gold app for free using the link below: Features Block incoming phone calls Everyone has that one number or more of them that they are concerned about and will avoid picking up their calls. The call may be commercial or a person who does not know when to give up, and this creates the need to block the call even more. Some devices on the market today there are such features pre-installed in them and thus require you to download third-party apps to get the job done because no one likes to be called over and over again, even after ignoring it the first two times. With Truecaller Premium Gold APK as the default call app, you can blacklist any number on your contact list and it will be instantly blocked from calling you. The caller can only hear a busy signal sign and will have no idea that they have been blocked while on your part, you won't bother with any phone ringing. Backlist The Truecaller gold app collects or aggregates information from multiple sources and users to regularly update the blacklist of spam numbers. Whenever you notice a range number to contact you, all you have to do is click The Block and report spam. Truecaller immediately identifies this number as regular spam, especially if it is blocked and published by more than one user. This helps create a better user environment because whenever an alternative Truecaller user is called using this spam number, they will be notified of it and have shown the number of spam messages associated with it. Recording phone calls with the Truecaller Premium Gold version, you'll get access to a call recording feature that seamlessly records the intended call live and with good quality. Users can also sync targeted records in the Truecaller cloud and play them whenever they want. However, you should be aware of your state's privacy policy regarding recording calls before you stop by this feature because it may land you in trouble, especially if your country has strict laws against recording voice calls. Otherwise, you can always record calls between family and lovers to cherish memories. Backing up and synchronizing with the Truecaller Premium Gold APK cloud allows you to back up and sync all call data on Google Drive, such as call history, all contacts, settings, and every message. So even when you change your phone, you'll never lose your calls, as you can always sync it all on a new device. This allows you to stay in touch with everyone around you, even after getting a new smartphone without worrying about forgetting anything. Block spam messages We all get these rogue texts from unknown numbers that inform us of the commercial business coming our way or a new service that will help us if we subscribe to it. Others may even come from gambling services or sports apps, and the only thing they have in common is that they are very good at filling the space on our phones The Golden Truecaller app lets you block any spam messages you're not interested in. However, since you can often find many users blocking their friends and lovers due to some problems, Truecaller allows you to see messages in the spam box because some users may also want to read these messages. This means that although the texts may be blocked, you can still access them from a spam mailbox if you so desire. Who viewed my profile with Truecaller Premium, you should create your own profile by including your name, photo and address, which is optional. This is someone who quickly identifies you whenever you make a phone call. Other people are also able to view your profile, but unfortunately with the original free version, you may never know who did it. Premium gold app though improves security by allowing you to see who recently visited your Truecaller profile. Incognito Mode When viewing other people's profiles, if they don't have a Truecaller premium gold app on their devices, they won't be warned about it. No ad ads can be a real pain in your neck, especially if you're trying to make a call or type a message, and in the middle of it, a banner pops up, interrupting the process. Many know how annoying that can be, but with the Truecaller premium gold version installed on your Android device, you get an ad-free experience. Premium icon Whenever you call someone, you benefit from having a premium icon on your subscriber ID. This will make you look very professional and people will be less reluctant to pick up your calls. It would be like an urgent business call, one of which they can't refuse. More contact requests If you feel like you want to broaden your horizons and make more friends, you can always discover new people in the Truecaller Premium Gold app by sending up to 30 requests to other users asking for their numbers. With Truecaller Gold membership, you get quick answers to your requests from higher priority support agents. How do I install Truecaller Gold APK on Android? Step 1. Remove any Truecaller app that is a free or modified app from your Android device. This is a much needed step to avoid installation errors. Step 2. Now download Truecaller Gold APK from our servers. Step 3. Open the android file manager app and then look for the APK file. Step 4. Click on the APK file. Here you can see the security alert saying to allow this source to continue. Include an option of unknown sources to install APK files. Step 5. Once you're done with this, head over the Truecaller Premium APK file and try to install it again. Step 6. Open the app and allow the permissions you need. Note: If you encounter a near-strength error, then clear application data and open again. Step 7. Enter your number to log in or sign up for an account. The final words Truecaller Premium Gold APK gives All premium features, but with a dash of gold that makes you stand out from the regular crowd. Get the app today and be recognized by VIP from whatever android device you might use.
