Nba 2k19 cheats reddit

This Btw is ridiculous that I have to use a VC to buy those players 2 8 Winning comments by two digits suddenly your players start to miss a simple layup or more and the players start to become gods. It's insulting how they cheated 2 48 comments Is this my career or the cpu career of each of my teams joining them playing like an ass. They haven't played D fukin they took a shot this wide open move has been in the game since 2k15 developers have never said they allowed the tone to go down ai taking a stepback shot when there was wide open. I say all this because im playing in the pro and the Cpu team is hitting pretty playful shots helping the defense spin properly while my team is equivalent to the Suns. Im winning games dropping 50, 60 points but how you reply when you play in an inconsistent team im pure btw player not around the superstar. Page 2 8 of our beloved company comments set a small drawback to make some VCs, and now we are struggling again to compete against the wallet heroes who dominate the park. Here you can share your method for making some VC.Page 2 111 comments and how can you understand /see if someone is cheating? Page 2 7 comments Used to love NBA 2K but it's a stupid game, otherwise for a classic team I wouldn't play this unrealistic basketball simulation. Ever played Play Now Online for months but still can't pass the development league. Have been to the European leagues but for some reason cpu it's like a game willn't let me win until I get kicked all the way to the varsity league. What about the players I called for illegal screens while posting? And the screen is illegal after the illegal screen. One opponent's incident I tried to dunk at me and missed, the ball flown into the air and would come out of bounds but miraculously the ball bounced back in the opposite direction to my opponent's hand?! The magical rebound got stolen despite being clear as the day that my players were the only ones in the aerial jump. I kept missing open shots while my opponent continued to drain three while my hands across the players faced, sometimes my hands would literally go through my opponent's head. blah blah blah. There are a lot of cheating things going on in this game and too much to mention. This is some of the most ridiculous. These cheats usually keep coming if I win in a row. I want to play online because I want to play with real players but the cpu keeps disturbing and honestly cpu gives me this favor sometimes. This is stupid why they can't let us play and test our skills with each other without giving favours to either player? My heck quite just playing evrything coz offline is the same. 2K is like cheating is never so angry with the hope your game goes down in the future. 2k wasting people's time and money. I don't get why there is no Anti-Cheat for 2K19 on At least there should be something like Easy Anti-Cheat but no, even if that is. So when do we get one? I just wonder if 2k, know about a lot of hackers on pc versions. Wonder if they're working on anticheats or atleast ways for servers to store attributes/badge information to check with customers for matches. If people hack their stats, it spoils the experience of new players in park games. Currently my hacks have done research on allowing you to allow 110 of all attributes, all badge halls of fame. So why would I buy a vc if someone could just flip on some free hack to cheat your character higher than you could buy. They can also hack in irregular highs, wings, tendencies (hot across the court) (indiscriminate ankle health) (high stealing probability). If any dev wana knows the actual application that premalizes this tells me I don't want to give more publicity I just want it to be made to realize it's active at 2k19 now and will hit 2k20 on the pc. Sell and Giveaway GuidelinesTeamate-Finding/LFG GuidelinesFollow 2K's Player Code of ConductPage 2 Verified Users, or logo players, are VIPs in NBA 2K. At NBA 2K21, there are professional players/colleges for major sports, artists, fashion designers, 2K influencers, 2K staff, and more. This list is not comprehensive. If you find a player that is not on this list, message us in modmail with who it is, gamertag, and screenshot. If you don't know who, we don't either. Again, please do not message modmail asking us who the player is. Players sometimes change their gamertag/PSN so tell us about any inaccuracies. Keep in mind that PC hackers can give themselves this logo, they are not real. NBA Players This player has an NBA logo or a basketball icon.
