It's just a testament to the phones from the brand. So if you're looking for a new smartphone that gives you access to a number of the best features and specifications but doesn't break the bank, you're in the right place. We have made this list of the best Xiaomi phones, so you can compare that can be great for you. Xiaomi sells its phones under mulberry brands: Mi, Redmi, Pocophone and Black Shark. Mi is usually its main mid-range brand, with Redmi its budget series, Black Shark putting out gaming phones and Pocophone do... Well, something like the original Poco F1 on this list was a budget phone, but the Poco F2 Pro certainly isn't. More recently we added Poco F2 Pro to this list, a new mid-company from its revived Pocophone brand. Phone scores are pretty high, showing the tactics of the company offering great specs at affordable prices is good. Currently in our labs are Xiaomi Mi 10T Pro and Redmi Note 9, and we will soon be testing other phones in these lines too. After that we hope the Xiaomi Mi Note 11 and Mi 11 devices will be launched so we can see how they fare too. Here's our rating Xiaomi phones, including Mi, Redmi, Pocophone and Black Shark Shark what you can buy right now. Looking at the specs of the list and images, you'd be forgiven for thinking that this phone was a top-end flagship phone, with a curved screen, 108MP main camera and a huge battery. But then look down on the price and you see a phone that is a third of the price of the biggest and best phones out there right now. Of course, there are a few flaws that stopped us giving this phone the perfect score, but it was a close call, and using your phone for various purposes is fun. With a number of specifications, which solidifies its position as the most premium phone from Xiaomi. It has a top-end Snapdragon 865 chipset, 108MP main camera, 90 Hz screen speed upgrades and fast charging 50W. The main problem with the phone is its price, as it's about twice as expensive as the Mi Note 10, but doesn't come with too many major changes to justify this cost (hence the Mi Note 10 taking the first slot on this list). There are also some interface problems too, as is the fact it comes with lots of bloatware and has a slow fingerprint sensor. It is worth noting that the Xiaomi Mi 10 Pro has seen a very staggered release as it is available in some regions, but not in others, and in some places it may not come out until the end of 2020. Keep an eye on when it's available in your area though, because it's definitely worth considering. Black Shark 3 has a lot of top-end specs like the Snapdragon 865 chipset, 5G connectivity, large battery and 90 Hz screen speed upgrade, but doesn't cost as much as many of its similarly-specced The phone has a great camera too, which is a kind of surprise. Of course, this phone is not for everyone, and unless you are an avid mobile gamer we don't recommend it to you (not least because its design is definitely definitely there but if you are prone to playing PUBG Mobile, Fortnite or Call of Duty: Mobile, you should definitely consider it. The Xiaomi Redmi Note 9S won't break the bank, but it does have a long-lasting battery, a good display and a high screen-to-body ratio, so if you decide to pick it up, you may be impressed by some of what's on offer. Of course, there are some symptoms of its low price too - charging isn't exactly fast, the camera is just fine and we've found a few bugs nowadays with the device. But if you're happy to miss out on some flaws, you'll be picking up a cheap phone that's better. Than many of its competitors with Redmi Note 9S. It's got top-end (for its time) specs and optimizing games, so it provides a great gaming experience, and it doesn't cost as much as other devices with similar specifications either. You might not want to consider Black Shark 2 if you're not a mobile gamer, since its appearance screams 'gamer' with LED lights on the back and black 'X' design, and on top that it might be too big to hold if you have small hands. So Black Shark 2 is aimed at a particular buyer, and if it's you, it's definitely a device that you should consider. Giving you a glorious full screen experience. In addition, the Mi Mix 3 is a competent mid-range device, with a decent battery life, a top-end (at the end of 2018) processor and two rear cameras. We found the slider a bit stiff and the whole phone is on the big side. But if you want a mid-range phone with a fun party trick, this is a great option. There's a 5G option too, which will cost you a little more. There's a lot like the Mi 9T Pro, with flagship-esque specs, great battery life, and a design that many people will find appealing - and all for a price tag that's significantly lower than most similar mid-range phones. There are a few issues here - among other things there is only one speaker (and it's easy to cover with your hands) and it's not waterproof. But you may decide that you can live with such disadvantages, given the low price tag.
