IMVU is a tool that allows you to communicate with people around the world with features that will make it easier to set up a chat and leave it your way. Another differentiation of the software is the ability to play with your contacts. With this software, you can customize your avatar. Thus, the software allows you to change clothes or shoes to look more elegant, change hairstyle, or choose another scenario. IMVU still comes with good 3D interface quality: Alternative Spelling: InstallIMVU\_526-536.6.34\_st.exe, InstallIMVU\_526.34'st.exe Last change: August 26, 2019 at 8:10 am. Number of downloads (Portuguese): 12347 Download count (worldwide): 66,765 Come live on your reach and communicate with others in the full virtual world IVU is an application that creates a virtual world in which you can interact with other people using a fully personalized avatar. With it you can enter a series of chats with different topics, in addition to managing your persona, buying items and even taking a pet. The program has a very active community, with over 130 million registered people, and a virtual directory with 16 million items for you to customize your avatar. However, it is a limited access program and can only be used by older people (18 years and older). To play you need to create an account and you can make yours here. As an alternative way to perform the task, you can use Facebook Login, Yahoo! or Microsoft account. A virtual worldOn the next time you enter the app, the tutorial is open, and in it, you have an order to perform tasks in order to unlock the program's features. Initially, you're responsible for assembling your avatar, the genre of which follows what was configured in the process of creating your account (without the possibility of change). Note that the symbol appears on the left side of the screen, and in this sector there are tools to zoom in or change the angle at which it is viewed. Then, in the center of the screen there is a list containing options There aren't many secrets in this task because all you have to do is choose what you want to change and enter the relevant sector. As for clothing, here you can change blouses, pants, shoes and accessories, and the game has several pieces for use in free mode. As for the appearance, there are options for hairstyles, eyes, heads, skins, avatars and the actions performed by them. In all categories there are products that can be purchased abroad, and options already included in your account. If you want a pet at the same time, they are only available for purchase with real money. Once the settings are complete, be sure to save your avatar so they are saved. Chat roomsBast, there are three types of interaction in IMVU; the first of them is chat in chat rooms. It can be used to view the environments available to communicate with other participants, with the ability to enable filters to refine the results, as in case you want a space in which to speak Portuguese. Similarly, there is a way to refine the search for the maximum number of participants allowed in the room. Also, if you have a friend with a chat already set up, you can use the search engine program to find it. Alternatively, you can create a new room with Converse Now. This process instantly assembles the room and begins to accept random people with whom you can start interacting. Finally, there is also Get Matched, which is more focused on those looking for a relationship. This feature works like a flirting app, with the aim of bringing together people who mutually like each other's profile. When you log in to this mode, you see multiple profiles on the screen, and you have to indicate if you want to have a relationship with that person. Once this is done, if someone you have positively tagged is also on your page, a pairing will be formed. Accommodation in the penthouse Not just the settings in the avatar and conversations lives the character of IMVU. In the game, you live on the roof and get access to your apartment using an alternative My room. As in the case of the persona, you can furnish the place according to your preferences and buy new items for real money. Your character can be placed at various points of the house and then you can invite your friends to visit him and even throw this party for their guests.
