Rumors help him navigate this new world in which he finds himself entangled. By fighting supernatural bosses, players will need to employ creative strategies to defeat them and collect the results associated with them. Players meet John Norton in Chapter 4 after discovering clues about his involvement in the murder. He was once a friend and business partner of the Hyde family, and was known to be easily corruptible. He is one of Adam's supernatural enemies in The Beast Inside. How to defeat Judge Norton in The Beast Inside After picking up the lock to get down into the basement, players will find a judge's wig and some notes. The man in the top hat and Norton will be seen in the basement during a cutting scene. Open the door with items found in the room and follow Norton's blood outside. Follow the path through a wooden bridge. There are structures around the bridge that contain supplies that will be useful in the following fights. The player will meet Norton outside the building during a cutting scene. To drive him away, the player will shoot a few warning shots and then have the opportunity to shoot him as a quicktime event. Shoot him and follow his bloodtra as the fog unravels, grabbing bullets from a wheelbarrow along the way. Norton charges the player as he follows his trail of blood, invisible until the time of the attack due to darkness and fog. Reload the gun and recharge the kerosene lamp after the bindings so that they are ready the next time it loads. To get the Ghostbuster feat, shoot Norton 10 times to have him retire. If players want to achieve this, they should make sure that more time is spent in this section than necessary, as Norton will stop appearing once they reach the inn. The gate will be locked, then walk and enter all surrounding cabins to collect bullets and other supplies before starting this boss fight. to head towards the bridge and watch the flames rise around the area as it starts. Norton has a variety of moves that can damage players long or short range. Armed with his axe, he can sink the player and perform a medium-range shot. It can also launch it to cause damage and and the player, and will try to enter for a final shot. Be ready to side-step Norton at any time. He will chase the player around the area with his axe. Sometimes he will need to be hit several times to shake it off. The gun cannot be reloaded during the run, so look for openings. Cover yourself when he first throws his axe and then moves before he returns to him, as it will cause damage on the return, similar to the axe throwing mechanic in God of War. It also has some more supernatural powers, such as Rage Burst and Summon Fog. Using Rage Burst, he can burst into the waves around him. Try to stay as far away from him as possible and create some space if it looks like he's loading this attack and starts screaming. With Summon Fog, Norton can cause a fog he uses to sneak in on the player. Don't waste valuable ammo trying to shoot him, as he is constantly on the move while using this ability. Instead, keep moving so you can't get a shot. Be careful not to get caught in cover while running backwards. Norton will use his axe attacks when the player is at hand, and supernatural attacks when they are farther away. If the gun needs to be reloaded, run far enough to trigger a supernatural attack without receiving any damage. Aim for Norton's head to take on the most damage. Once he takes enough damage, he will fall and then the player will have the opportunity to get more shots in. Keep moving and keeping up while attacking, or moving in a circle. This makes it really difficult for Norton to hit the player and deal with an actual amount of damage. Bullets are hidden around the location in case the player gets a little too happy trigger and wastes their resources. Once Norton is damaged enough, the second phase of his attack will begin. When Norton starts his next wave of attack, he will gain the ability to use Fire Rain. He will fire in the air to fall on you with this ability. Players can predict where the fire will fall based on glowing spots on the ground. Be sure to move locations often while this attack is being used. Shoot Norton repeatedly to continue causing damage and ending the fight. At this point it will be on fire and quite easy to locate and aim for. If the player dies during this stage of the battle, they will have to restart the entire battle. When John Norton is defeated, the player will receive the long arm of Justice. Now that Judge Norton has been defeated, Adam is one step closer to solving the murder and getting rid of the rumors he heard.
