By muzanaka, HomeBrew, Wad Installers, Tags 10, Homebrew, WAD Dec 21 2012 Special Installers are used to install .wad extension files. One such program is YAWMM For what Yawmm needs to install wad files. Wad files compress all WiiWare games and programs, lots of HomeBrew programs like NeoGamma. This is a HomeBrew program, so it will not be put on the console until after Softmoda 1. 3.Fold all wad files on SD card (it is best to create a folder at the root of the memory card called wad) 4. Insert the memory card Wii and turn it on. 5.We will go to the HomeBrew channel and select YAWMM (yet another wad manager mod), push the load, wait for launch. 6.Cross mout select the folder where you threw wad files, click A. 7.Select the wad file, press A selection. There is a menu where the cross decides to delete/install the wad file. If we install, we will only wait for A if we remove - right and A. 8.Wait until the wad is installed, and then go to the menu with the Home button on Mout. If you want to install a few wad files, you can highlight them with a button – this allows you to install all the wad files for yourself. He installed yawmm to install NeoGamm.
