DiskDigger Pro (for root devices!) can bomb and recover lost photos, documents, videos, music and more from a memory card or internal memory (see supported file types below). Whether you accidentally deleted a file or even reformatted your memory card, DiskDigger's powerful data recovery features can find lost files and recover them. Note: If your device is not rooted, the app can only perform limited scans for deleted photos. To be able to search for other types of files, as well as search for all the internal memory of the device, the device must be rooted. On a non-root device, the app can only recover versions of low-resolution photos it finds in the device's cache and sketch catalogs. For full instructions, please can download the recovered files directly to Google Drive, Dropbox, or send them via email. The app also allows you to download files to the FTP server or store them in another local folder on your device. DiskDigger can recover the following file types: JPG, PNG, MP4/M4A/3GP/MOV, GIF, MP3, AMR, WAV, TIF, CR2, SR2, NEF, DCR, PEF, DNG, ORF, DOC/DOCX, XLSX, PPT/PPTX, PDF, XPS, ODT/ODS/ODG/ODG.SIP, APK, EPUB, S. What's new update to Android Screenshots When using our smart devices, often, we accidentally delete certain files that are important to us. This is a common mistake, but if your store doesn't have any backup and recovery options, your files are pretty much lost. This is why many Android users will definitely find this interesting mobile file recovery app DiskDigger Pro is a great tool to have on your devices. Now, with useful and powerful features in the app, the DiskDigger Pro file recovery will make sure that all lost files can be recovered. Feel free to collect documents, photos, videos, music and many other lost files that have been accidentally deleted. And unlike other mediocre apps, DiskDigger Pro File Recovery offers impressive recovery options for you to fully scan the vault and recover any lost files. Find out more about this interesting mobile app from Defiant Technologies with our full feedback. For those of you who need a secure tool to protect your files and app data, you will surely find DiskDigger Pro File Recovery is a great mobile app to have. Here, the tool offers many interesting features that will make it completely possible for you to search and lost files on your Android devices. Feel free to choose which files you want to recover and have them ready on your mobile devices again. At the same time, file recovery DiskDigger Pro will offer many useful storage management options that will allow you to work with files and that your store is well organized and optimized. Feel free to scan redundant files that take up limited storage, remove unnecessary files, and free up storage space for better mobile use. To start restoring DiskDigger Pro files on Android devices, mobile users will need to pay for a paid version of the app on the Google Play Store. So if you don't want to pay for Android apps, it's going to be tricky. At the same time, restoring the DiskDigger Pro file will require you to give it root permits in order to acquire its full capabilities. Otherwise, you'll only be able to use DiskDigger Pro file recovery for simple scanning and recovery tasks. And to make sure that the DiskDigger Pro file can work properly on your Android devices, it's important that they run on the latest version of the firmware, preferably Android 4.0 and up. Here are all the interesting features that the app has to offer: For a start, Android users in DiskDigger Pro file recovery can comfortably work with the app in finding and restoring any of the selected files, thanks to its full compatibility with most file types. Feel free to scan photos, videos, documents, music and many other types of files in your system that can be easily restored by restoring DiskDigger Pro files. In this case, the app now supports more than 40 different types of files and expands. To start using the app, you can simply complete a full scan of your system, allowing the app to search for hidden and recoverable files in your system. Here, depending on whether your devices are rooted or not, restoring the DiskDigger Pro file will provide a variety of scanning options: If you don't have root permissions, you can only do a basic scan of lost photos. On the other hand, with root resolution enabled, you can try to search for all kinds of files on different segments of your store. With all the results collected, you can start filtering the search results to restore the DiskDigger Pro file. This will allow you to quickly select the files that need to be recovered and just return them. Feel free to choose the types of files before you search for it, or filter search results by names, dates, and more. All this should make the app extremely easy to use. For those of you who are interested, you can now use DiskDigger Pro File Recovery to scan storage and redundant files that can be cleaned. Feel free to get rid of unnecessary cache sketches that you don't use. Also delete newly created log files that you don't need include space for further editing. In addition, if you want to completely delete the files and don't want them to be restored, then you can also use the Wipe Free Space option in restoring DiskDigger Pro files, which will make it its You can get rid of all potential backup options for any of your deleted files. As a result, they will be permanently removed and cannot be restored. For those of you who are interested, you can now back up your files using online drives or local storage in DiskDigger Pro file recovery, making it a lot easier to recover them later. Feel free to download recovered files to any of your Google Drive, Dropbox, or send them via messages and emails. Also, if you have an FTP server, it is possible to keep them on those servers whenever you want. Finally, feel free to keep your files in your local storage. If you find a paid version of the app in the Google Play Store is not exactly interesting, then you can go to the unlocked version of diskDigger Pro File Recovery on our website.
