Swift Black Substratum Theme apk is an Android customization app that lets you change the theme of different apps in your smartphone, making almost everything dark (black), and completely differentiated, that's what makes it so popular. Today, the app contains more than 200,000 downloads in total. Swift Black Substratum Theme makes more than 200 apps black and supports: Android AOSP Nougat, OreO and Pie - OnePlus (supports OnePlus 3, 3T, 5, 5T, 6) OreO and Pie - Samsung (supports S9, S8, S7, Note8, Note9, others) Nougat and OreO - Nexus Nougat and OreO - Pixel OreO and Pie - LineageOS - Option of choosing your favorite system accent in Pie, OreO and Nougat! WHO Swift Black Substratum Theme APK Themed Apps - AOSP Browser - AOSP Calendar - AOSP Keyboard - Calculator - Chrome Beta - Chrome Dev - Contacts - Dialer - Documents / Downloads - Dropbox - Email (AOSP Email) - ES File Explorer - Facebook Messenger - Gmail - Google Allo Drive Swift Black Substratum Google Now - Google Plus - GroupMe - Hangouts - Mailbox - Instagram - Soxsh - Keep - Nova Launcher - Omni - Pushbullet - Root Explorer - Settings - Skype - Slack - SuperSU - System UI Swift Black Substratum Thematic List of Compatible Apps: Instructions and Important Information: Swift Black Substratum Theme Installation: 1: See the support list above. 2: Download the Substratum theme engine app and theme. When you open the Substratum app, you'll find a theme inside it. If you're using Andromeda or Samsung, you'll need an additional paid add-on to let you know when you first open the Swift Black Substratum Theme app. 3: Open the theme in the Substratum app and select your Version of Android from the menu at the top. Also, select the apps you want the theme and click set. 4: Wait until all the linings are set and then restart. If you're using Samsung OreO, you'll need to include all overlays in the Manager in the Substratum app after the restart. More detailed instructions can be found here: Swift Black Substratum Theme Update: The Play Store Theme Update. After the upgrade, make a clean pad installation: Remove all overlays from The 'manager' you find in the left navigation box in the substrate. When this is done, set the new linings and then restart. When you're about to update the firmware, remove all overlays before upgrading. Troubleshooting: If the app stops working, you'll need to reset the overlay and reboot this app. This is necessary because the overlay must be applied over the application. For example, when you upgrade an app from the Play Store, the overlay is no longer at the top. When you reset the overlay and restart, you'll be sure it's over again. Here's how the linings work. The best way to keep the theme running over time: Every time you update an app to a new version of the Play Store, there's a risk that it doesn't match the version on which we're the basis of the overlay theme. The best way to keep all overlay works over time is to disable automatic updates in the Play Store and update apps when we update the theme. We update every four to five days, so you don't have to wait long to update everything. The Swift Black Substratum ROOT theme is not required for Samsung, Andromeda (Pixel and Nexus) or OMS systems. Other systems need to root. Need help with Swift Black Substratum Theme? If you need help, please contact us via Telegram or email and we will help you personally based on what system you use. PLEASE DO NOT report errors in the review system, as it is much easier for us to help you with chat or email. Check-in policy: If you downloaded the Swift Black Substratum Theme and can't use it, you can return it to the Play Store within two hours from your mobile phone and 48 hours on your computer if it was your first purchase. If you prefer, please send us an email with the GPA order code within 48 hours of purchase to send a refund request to Google Play. This is really only if you download from the game store. Who! Supported application list: Instructions and Important Information: SOURCE: 1: Make sure your system supports the use of the substrate See the list of support above. 2: Download the Substratum theme engine app and theme. When you open the Substratum app you will find the theme inside. If you're using Andromeda or Samsung, you'll need an additional, paid, add-on that you'll be notified of when you first open the Substratum app. 3: Open the theme inside the Substratum app and select your Version of Android on the menu at the top. Also select apps that you want the theme and hit set. 4: Wait until all the linings are set and then restart. If you're using Samsung OreO, you should include all overlays in the Manager inside the Substratum app after the restart. More detailed instructions can be found here: UPDATE: Theme Update from the Play Store. After the upgrade, make a clean pad installation: remove all overlays from the 'Manager' overlay that you find in the left navigation box inside Substratum. When this is done, install new linings followed by a reboot. When you update the firmware, make sure you remove all pre-update overlays. PROBLEM SOLVING: If the app stops working, you need to reinstall the overlay for that app and reboot. This is necessary because the overlay must be applied on top of the application. For example, when you update an app from the Play Store, the overlay will no longer be on top. When you reset the overlay and reboot, you'll make sure it's re-installed again. That's how the linings work. The absolute best way to keep the theme running over time: Every time you update an app for a new version from the Play Store, there's a risk that it doesn't match the version we're based on the theme overlay on. The best way to keep all overlay works over time is to disable automatic updates in the Play Store, and update apps when we update the theme. We update every 4-5 days, so you don't have to wait long to update everything. ROOT does not need Samsung, Andromeda (Pixel and Nexus) or OMS systems. Other systems need roots. NEED HELP? If you need help, please contact us by Telegram or email and we will help you personally based on what system you use. PLEASE DON'T report errors in the review system, as it's much easier for us to help you with chat or email. IF THEME DOESN'T WORK FOR YOU: We offer a refund to anyone who downloads the theme but can't use it, just email us your order number. Support Channel (Telegram): frequently asked questions: Notable changes: The updated theme for new app updates The full list of changes is in the Documentation.
