## Ozark trail 3 room dome tent instructions

Themah 3-Dome Trail Ozark connection is a set of three types that suit 8 to 10 people. Three campers are connected, and are accessible without having to leave the themah system. The connected large mat covers the area in front of three types. You can use this space for activities. Tent gatherings are simple, and you can do it quickly after you hang. The items you need Ozark Trail 3 Dome extension tentStakesHammer ensure that all parts are included in the package and in good working conditions. Refer to the owner's manual for their list of sections and descriptions. Place the central themah on the flat surface. Central dent is the largest. Verify that the door is not wasted. Extending the exit point as far as possible on both sides. Extend the duhemah pole by pulling them out on each side. Slide the main pillar through one of the central arms. Attach the end of the pillars to the five-way central hub. Repeat this for the other four main pillars. Save the other end of the pole to the pin ring at the base of themah. Snap a quick clip to each pillar. Clips are quickly attached to the body of a camper. Place the smaller camper on both sides of the main pot. Sliding poles through the arms of the front polls and back-to-back poll arms. Your action should create an X. Save pole to the base of themah with a pin ring. Snap a quick clip to the pole throughout their length. Repeat this step for another small camper. Connect three-per-way with zip alongside flaps connection. The flaps of the zip connection are on both front pole sleeve. Repeat this step for two smaller campers. Save themah to the ground by driving the stakes through each pin ring. Save the door by driving the stake through each big webbing loop. Ozark Trail 3 Tent Room 20x10Ozark 6 Dome Tent. 1 SOURCE Answer: I have this glory and have managed to put it several times. It's a big company but it's frustrating to put up sometimes. Plan to have some people to help you. I find that it is very helpful if there is a total of 3-4 of you. Color-coded collars. The central support is a red stick. Both side support is blue with graphite-looking rats passing through the camper. Spread the tent on the ground and try to finalize it and make it though. center pole through the top and connect to the curved piece which then connects to the red dot pole on the side. Hoist in its entirety. Had two men holding the pillars for a while. Get a foot pole into a black coupling and put the graphite looking for rats through the tent. It's going to be a bit tight. Hoist the blue pole into position. The bottom of the blue dot pole should be about two feet from the center. They extend out at about 30 degrees angles. Make sure your middleman holds the middle pole and let two parts of the blue dot pole elongate out. You'll start looking at the tent shape. Your central handler may need to keep and observe the pillars. Now, start trying to get some interest in it. Working corners. Once they are in and things start to get tight, it should start holding on their own. Work all interests in and make adjustments to all required pillars. Extend the red dot pole until the roof is at the right height. I tend to do this last. The base flew basically clips into a hole on a blue dot pole. It is kind of a pain to set up but it is a big tent and works well once it ends. I took a ton of pictures after I got it the first time. As I took it, I shot the picture. Then, I reversed the order and printed it to the book and now kind of use it as my manual. Calculated on 22 June 2010.
