Adventure games are some of the most unique of all games. They do not fit into one category or genre, and often they fit into several genres at the same time. The only real condition for the game to be an adventure game is that it has to take you on an adventure. This describes most games. However, adventure is not a genre defined by mechanics like RPG, first-person shooters, or sandbox games. Thus, an adventure game can be anything. We've been listening to reader comments for years after writing this, so we hope we've found some decent games that will entice you on a fictional adventure. If you're ready for a list of games that will do just that, here are our picks for the best adventure games on Android! Price: \$5.9980 Days is one of the best adventure games for Android. You play as Phileas Fogg's assistant, Passepartout, and you try to circumnavigate the globe in just 80 days. You can take airships, submarines, trains, and even mechanical camels. Players need to manage vital phileas as you travel around the world or risk losing the game. The game is playing at a fast pace and you are literally an adventure around the world. In addition, you also race other players to see who gets there first. This is one of a kind of type of game and well worth its price. Another EdenPrice: Free playAnother Eden is JRPG from 2019. It has the same writer and composer as Chrono Trigger and there are many callbacks to the popular game. Another Eden doesn't play like your usual mobile RPG. It doesn't use mission-style history, and the menu is virtually nonexistent. Players go on an adventure through several points. There are some elements of goach as well as some non-history missions to complete, but they all happen as side quests in the game structure. It feels like those JRPGs in the late 1990s and early 2000s. This is a rare freemium game that is just fantastic to play. CrashlandsPrice: \$4.99Crashland is already among the best adventure games of 2016. You play as a space trucker named Flux. The game begins with the fact that you fall on an alien planet. Your job is to get your load, build your base, fight the bad guys, and save the world. It has many gaming elements, including crafting, fighting, RPG-style character alignment, and you can even tame creatures to fight for your side. It's a deep game with a ton of content that you can play on both your mobile phone and your PC. This 4.8 rating on Google Play is accurate. Evoland 2Price: \$7.99Evoland 2 is easily one of the best adventure games of late. It goes beyond genres, including a whole bunch of them. This includes 2D RPG, 3D fighter, trading card, hack and and many others. The game basically progresses through different era games, and each new mechanic also brings a new graphic style as well. Its unique game keeps you guessing and it's a nice overall total We recommend playing with a physical controller for the best results, however. The game is also constantly on sale, so you can most likely pick it up for less than \$7.99 the asking price. Grand Mountain AdventurePrice: Free/\$5.49Grand Mountain Adventure is one of the new adventure games on the list. It's a ski game with racing and research elements. Players ride the elevator on different tracks. Then you ski the tracks and try to beat the time requirements. However, you can also just ski around and see the sights. There are also hidden areas, five mountains (in the premium version), online leaders, and you can even do tricks when you hit the big air. The controls and prospects of the game are a bit strange at first, but not too hard. The graphics are also gorgeous and the game is smooth. You get the first mountain for free and you can buy a premium version to unlock the rest. Leighton seriesPrice: \$9.99-\$15.99 Each Professor Leighton franchise presents 17 puzzle adventure games. They all started initially on the Nintendo 3DS, but now have mobile ports. The games are a bit pricey but good overall. You explore different ruins and places like Leighton with Luke. There are different puzzles to solve, narrative to enjoy, and various relics to collect. It's a fairly simple gaming experience and it doesn't take long to learn the controls. This series sold 17 million copies when it was on conventional and portable consoles, and if there was any justice, it would get another 17 million on a mobile phone. They are also cheaper on Android than they are on Amazon.Monument Valley 1 and 2Price: \$3.99-\$4.99 each and \$1.99 for DLCMonument Valley 1 and 2 are two of the most popular adventure puzzle games available. You move the levels around because each level is a puzzle. Players refer to optical illusions, vague but amusing history, and consistent experiences through two games. The first game includes a standard DLC story (\$1.99). The second game is now \$4.99. The only complaint we have is the length of the game. These games are a little short. They are still very big games, but those who don't like short games may be disappointed by that. OddmarPrice: Free/\$4.49Oddmar is a charming adventure-platformer from the same Good Luck Leo developers. You play for a struggling Viking who wants to regain his honor. You are an adventure all over the gaming world in order to do just that. The game has a smooth game, excellent controls, and excellent level design. In addition, it hits all the extras with a hardware-enabled controller, Google Play Games cloud saves, and it works offline once you get everything Loaded. The game is a little short only on 24 levels, but each level has a 3-star rating system to promote replayability. You'll get a little game for free before you have to unlock the rest with one in-app purchase RuneScapePrice School: Free/\$10.99 per month/\$99.99 per year Old School RuneScape is one of the most popular MMORPGs on mobile. It uses a free and subscription model instead of freemium, like most MMORPGs and some players really appreciate it. Either way, it's just like old school RuneScape. Players run, complete quests, trade things with each other and have different skills to master. You can play solo or with teams, and there is content for both types of games. There is free play to the world. It has less content than its premium counterpart. The premium version adds a bunch of extra stuff. If you want adventure, this game has it in spades. Pokemon GoPrice: Free to playPokemon Go is one of the most ambitious adventure games. You actually go out into the real world and catch Pokemon, fight in gyms, rob Poke Stops, and more. The adventure element is a little more literal in this game than others. This requires you to go places on your own and play the game in these places. Players roam the open world and catch Pokemon, fight in gyms, fight each other, trade Pokemon, collect various items and do all sorts of other things. This genre is expanding as well and you can play similar games with Minecraft: Earth, Harry Potter: Wizards Unite, and Jurassic World Alive.The Room: Old SinsPrice: \$4.99Most of the room games are not adventure games. The same can't be said for the newest game in the series, however. Room: Old Sins includes elements of exploration along with its iconic puzzle structure. This gives it an extra dimension that previous games don't have. For the uninitiated, The Room is a series of games with great graphics, complex puzzles and secret themes. The latter, One Sins, also supports Google Play Games achievements, cloud savings and more. This will be one of the best puzzle-adventure games of 2018 for sure. Rusty Lake (Cube Escape) seriesPrice: Free / VariesCube Escape presents 100 mysterious adventure games where you have to solve puzzles to find out what's really going on. It's also known as the Rusty Lake story, and it's actually playing online as a web game as well. The mechanics are pretty simple and each game has you solving different puzzles in order to progress in history. It's technically they're an escape game, which means that most of the time you'll be solving puzzles. However, this is a great series of games. We include it in this list because the Cube Escape series is almost completely free without in-app purchases, making it one of the best at this price. There are some premium games from developers as well, which is really good. Square EnixPrice: Free / VariesSquare Enix can pen one The narrative and its narrative is one of the best in all games. Thus, most of their mobile games make for great adventure games. Some examples include Mana, Mystery of Mana, Life Strange, Final Fantasy: Brave Exvius, various Dragon quest games, World Ends With You, Final Fantasy XV: Pocket Edition, and many, many others. The aforementioned games span several genres, including RPG, puzzle, piece of life, and hack-and-slash. For some reason, half of the Square Enix library is under a different developer name than anything else. We have one connected with all the Final Fantasy games and the mobile ports of the old RPG. You may have to search for Tomb Raider and Life Stranger Things on Google Play. Either way, the Square Enix catalog doesn't have any short games, really, so get ready to strap and play for a while. Swords DittoPrice: \$5.99 Swords Ditto is a kind of our diamond in the rough pick. It had a rough start with many mistakes and complaints. However, most of them are gone now and the game is actually very good. It plays as a classic adventure game. You explore the world along with various dungeons. Players collect loot, cut bad guys, do heroic deeds and save the world from the big bad Mormo. It's a bit demanding on older devices though, so be sure to try it out before check time to make sure your phone can handle it. WitchSpring4Price: \$4.99WitchSpring is an adventure game that should probably be more popular than it is. You play for a witch who is also the ruler of an entire continent. Players explore the world, meet different characters and do different things. This is an amazingly charming RPG from a developer who has a lot more in Korea than in other parts of the world. There are actually four games in the series. The first two tell the same story, but from different perspectives while the third and fourth games are standalone entrants that you can play without having to play others. Games range from \$1.99 to \$4.99 each, and they all go very well. If we missed any of the best adventure games for Android, tell us about them in the comments!
