Take the role of acrobatic, triple-jumping stickman, and pit your wits against 9 side-scrolling platform levels! Stick Run 2 is a cool 2D arcade survival game where you guide a magical jumping stickman to the end of a level by jumping over multiple platforms, performing slippery wall jumps, and avoiding a catastrophic crash into the abyss at the bottom of the board. Required Skills: This fun and addictive, parkour-style skill game requires a neat mix of quick reactions and engaging keyboard control skills. Good timing is essential to keeping the stickman hero in the game, and trial and error is important in later levels. Sharp expectations skills are also essential – You need to use good judgment to figure out possible fluctuations in platform movement as you progress. How to play: Flash-based, stick platformer game for laptop, laptop and desktop / Mac (with certain browsers). In each of the 9 still-difficult levels, your task is to safely guide your hero stickman over the wall at the end of the left to right, side-scrolling environment. Control the movement of your stickman with the arrow keys on your computer keyboard. Stickman has two special moves - First is his ability to jump three times without touching the ground. This makes reaching tall ledges much easier. His second special ability is the movement of jumping into the wall. Hold down the arrow that directs your stickman toward the wall (it should cling to the wall for a while), and then press the up arrow at the same time. If you fall into the abyss at the bottom of the board, automatically re-spawn at the beginning of the level. You have an unlimited life. If this flash-based game already works on an IE11 or Chrome browser on your PC/MAC, try playing Firefox with Adobe Flash Player installed. FacebookTwitterPinterestGoogle PlusInstagramRSS Hello there!
