If you want to learn how to upgrade the LG G4 to have Android Nougata, in this article you will only find a guide to learn how to do it. It's pretty simple all over and outright, so anyone with the knowledge they have can upgrade their LG G4 device to Nougata in a matter of minutes. So I can assure you that in less than ten minutes you'll have a new version of Android on YOUR LG G4 and without complications follow this tutorial step by step. The battery must be at least 80% to continue. In addition, you need to have the original USB cable, this avoids connectivity problems. The USB debugging should be enabled, located in the developer's settings. If you don't see these options, you just need to go to Settings and click the compilation number several times lower until a pop-up message appears. Now you need to disable the Windows firewall and even antivirus to avoid conflicts during installation. In addition, you should have LG Flashtool and KD' installed for LG, both versions for this particular device. Update Android Nougata to LG G4Start SW mode on your device or what will be download mode on any Samsung, for example, and connect it to your computer. After you connect, copy the KD file to the LG Flash Tool. The only thing left to do is just start the process of updating your LG G4 to have Android Nougata, it may take some time, but it is just a matter of patience and in a few minutes you will have the latest version of Android available for this mobile phone. As you'll see, the Nougata update isn't difficult at all, it can take about ten minutes or less to get everything set up and running. Similarly, any doubts you have can be left a little lower in the comment box. Install Android Nougata on the LG G4 H815 with this tutorial very easy When the new version of Android comes out, we all want our device to be obviously compatible. It always brings significant improvements and in most cases in terms of interface it improves a lot, so it's normal that you want to update, especially if it's Android Nougata, at least the latest version of the operating system Google.Se it is so, and you want to update the LG G4 G815 for Android Nougata, then you have to keep reading, because in the next tutorial I'll show you how to do it, you have to follow it step by step and satisfy everyone To be able to install this version without any class flaws, be very careful.How to install Nougata on the LG G4 H815 Before all of course you have to have a backup of your files, since when you install a new ROM on your device, it is more than obvious that everything you have on it will be lost. In addition, the battery must be charged at least 70% before it starts. I think you don't need to clarify that you need to have the downloader unlocked, TWRP Recovery installed and be a root user in order to perform this procedure, in case you don't have it all, you should start there. Download Android 7.0 Nougata for your LG G4 H815 right here. Starting Android LG G4 updateYou should have a downloaded file on your mobile device, once everything is ready, you have to do nothing but turn it off. Now you have to hold the volume and power buttons for a few seconds. You'll see the TWRP logo, that's when you have to give them up. The only thing you need to do here is flash ROM that you downloaded earlier, is done by installing or installing the option, you have to look from there file that I made you download earlier to start installing. It may take some time, so I recommend you be patient as soon as you have to do it is to look for a reboot option to be able to restart your mobile device and then start using Android 7.0 Nougata on it. 189 Android News 02 February News for LG's top-in-the-range Bootloop event.
