Modes:the modeThis zombie mode is the most anticipated in Call of Duty Mobile APK as it does not appear in beta. There are huge waves of zombies approaching your base, meanwhile, you have to look for knowledge and Easter eggs to figure out the plot in this mode. However, there is no survival mode here. Instead, you have certain missions and will face the final boss at the end of the story. The maps will be revealed in progress as soon as you complete your missions. A variety of weapons and items are also available to make you happy. Battle Royale modeBattle Royale mode is a big hit from Activision as they did it perfectly. It still has common features of the Battle of the Royale like Free Fire APK or pubg mobile, but contains some unique differences: differences: maps and roles. There are four vehicles: ATV (two-person bike), light helicopter, SUV, and tactical raft. The maps are a huge combination of the old version of COD and new content, which makes the players interesting. Roles are the most unique moment here as you will play different positions in the game: defender, mechanic, scout, clown, medic, or ninja. Each role has certain abilities, skills and objects that they must complete. This feature is also one of my favorites. Multi-players This mode brings you a big battle, so you can compete with others for rows and levels. Millions of players in the world will compete with each other and fight for the high class. There are seven game modes in Call of Duty mobile apk and this will make you interested. In the front line, your team must kill a certain number of enemies and reach the target number first to win the match. This kill target is set before the game starts. Most FPS players who are used to control systems on PCs or consoles probably don't like playing their favorite games on Android devices.
