The revised editions of the manual will be published here as they are released. Chapters can be purchased in a solid copy from the office. Chapter 1 Introduction (ISBN 9780115505591) Introduction and sketches of historical, functional and design aspects of the signs. The chapter includes sections on the positioning and installation of signs. Chapter 2 is currently under development. It will contain recommendations for the design and use of directional signs, as well as other information signs such as home zone signs. Zone. the scope of work required to complete Chapter 2 is intended to ensure that interim consultations on individual topics are provided as they are completed. Current recommendations for the development and use of targeted information signs are published in local Transport Note (LTN) 1/94. Also available is the latest list of major destinations in England (PDF, 64.4KB), which overshadows the information in LTN 1/94. Chapter 3 Regulatory Signs (ISBN 978011529252) Guidelines for the proper use of regulations prescribed by traffic regulations. These include prohibited turns, waiting and loading restrictions, bus and bike lanes, etc. Chapter 4 Warning Signs (ISBN 978011524110) Warning Signs are used to alert drivers to the potential danger ahead. They point to the need for special caution on the part of road users and may require a reduction in speed or some other manoeuvre. This reissued edition includes 4 minor amendments and the addition of Annex A, Note 7. Chapter 5 Road Marking (ISBN 9780115524790) Road markings are a very important function in transmitting information and requirements to road users that may not be possible with vertical signs. They have the advantage that they can often see when the face of the set sign is hidden, and, unlike such signs, they can ensure the continuation of the message. Chapter 6 traffic management (ISBN 978011537448) Traffic lights, and crossings are a key tool in traffic management. This chapter provides technical recommendations for the design of traffic lights, crossings and other types of traffic management. It sticks out recommendations in a number of leaflets on traffic and local transport notes. Chapter 7 Road Signs Design (ISBN 9780115524806) as a sign of the face developed. This chapter does not include the various methods by which the signs are constructed and installed. It overshadows the local '2/94s '2/94 message note, which was withdrawn in 1997. Chapter 8 (part 1) of roadworks and temporary situations - Design (ISBN 9780115530517) Guide to develop temporary situations. For requests and comments regarding this chapter, please email chapter8@highwaysengland.co.uk. Chapter 8 (part 2) roadworks and temporary situations - Operations (ISBN 978011530524) Guide to planning, managing and participating in operations to implement, maintain and eliminate temporary traffic control. For requests and comments regarding this chapter8@highwaysengland.co.uk. chapter8@highwaysengland.co.uk. chapter8@highwaysengland.co.uk.
