Recommended Fonts Keyboard Layouts Mac vs. PC vs. Linux Rendering Issues (en) Credits Recommended fonts Bengali Alphabet uses the same written characters as assamese. Assamese, however, contains two characters that are not used to write Bengali. If otherwise stated, the fonts below can be used to display all characters in both languages. SALRC recommends the following fonts for Bengali and Assam language pedagogy and internet applications: Click on font names or samples for specific information and text samples for each font. (Back to the top) Layouts typing and keyboard Layouts For typing in Bengali on Windows platforms, SALRC recommends the following options: Windows XP Service Pack 2 Keyboard Layout: Windows XP Service Pack 2 update features Sparker Unicode support. Once updated, the layout of the keyboard can be selected by navigating on: The control panel is a system of the languages. (Click on the How to instal fonts and layouts in the left navigation desk for more information). The keyboard can be viewed using the on-screen keyboard viewing (Start zgt; Files program zgt; Utilities are available on the on-screen keyboard). See the Microsoft Layouts keyboard page to see the various layouts available for Windows XP/2000/Server 2003. Microsoft Keyboard Layout Creator allows the user to create a new keyboard if the default keyboard layout is undesirable. Note: If the Windows XP 2 package is not installed, Bengali will not appear as an option in the language support menu. Microsoft's Bhashalndia website provides a set of phonetic input editors (IMEs) for Hindi, Bengali, Gujarati, Cannada, Malayalama and Tamila. IME is a separate application that should work alongside Microsoft Office software. Compatible with Windows 2000/XP. Ekushey Shadnota: Free Keyboard Interfaces Bangla and Assamese for Microsoft Windows 2000/XP/2003, developed by Ekushey.org, currently offer five different keyboard layouts: Bangla Unicode, Rupali, nSCRIPT, Probhat, National and Uni Joy (a modification of the popular Bijoy layout). Compatible with the new Unicode 4.1.0 implementation in Bengali. OpenOffice.org: A free open source office suite that is Unicode-savvy, OpenType enabled, and able to run on Linux/Sparc, Mac OS X (with X11), and all modern Windows platforms, including Windows 95. (Back to the top) Rendering issues: Mac vs. PC vs. Linux Fonts recommended on this page has been tested for functionality on a PC running Windows XP/2000/2003/NT. They are unusable with Macintosh computers because they use OpenType technology, together Microsoft and Adobe, to display vowels (matras) and ligature accordingly. While OS X also recognizes OpenType layout tables, it uses a different rendering engine (ATSUI), and these fonts are written for the Microsoft engine (called Uniscribe). There is However, Ekushey.org currently offers a free Unicode Bangla system solution for OS X that includes two keyboards and two fonts. These fonts are compatible with most Linux distributions run by Gnome or KDE. Most major distributions also offer or include free Bengali language packages that include keyboards and fonts.
