Problem 1 : Adult tickets to Space City amusement park cost x dollars. Children's tickets cost y dollars. The Henson family bought 3 adults and one children's ticket for \$163. The Garcia family bought two adults and three child tickets for \$174. Write equations to represent the cost of the Hensons and the cost of Garcia. Solve the system and interpret the solution in the original context. Problem 2 : Hertz Car Rentals Cars for x Dollars a Day Plus Dollars for Every Mile Drive. John rented a car for four days, drove 160 miles and spent \$120. David rented a car for one day, drove 240 miles and spent \$80. Write equations to represent John and David's expenses. Then solve the system and say what each number represents. Detailed Answer Key Problem 1: Adult tickets to Space City amusement park cost x dollars. Children's tickets cost y dollars. The Henson family bought 3 adults and one children's ticket for \$163. The Garcia family bought two adults and three child tickets for \$174. Write equations to represent the cost of the Hensons and the cost of Garcia. Solve the system and interpret the solution in the original context. Solution : Step 1 : The Henson family bought 3 adults and 1 children's ticket for \$163. Then, cost Henson :3x and 163 ----- (1)Step 2 : The Garcia family bought 2 adults and 3 children's tickets for \$174. Then, Garcia's cost : 2x and 3y 174 ----- (2)Step 3: Solve the system : Solve (1) for variable y. 3x and y 163Subtract 3x on each side. y No 163 - 3x ----- (3)Step 4 : Replacement at 163- 3x in (2). (2)----- 2x No 3 (163 - 3x) - 1742x - 489 - 9x - 174489 - 7x - 174Subtract 489 on each side. -7x -315Divide on each side -7.x y 45Step 5 : Replacement x No 45 in (3) for solv for y. (3) ----- y 163 - 3(45)y solution for the system (x , y) y (45, 28)Step 6 : Interpret the solution in the original context :So, the adult ticket price is \$45 and the price of a child's ticket is \$28.Problem 2: Hertz Car rental car for a dollar per day plus for dollars for every mile drive. John rented a car for four days, drove 160 miles and spent \$120. David rented a car for one day, drove 240 miles and spent \$80. Write equations to represent John and David's expenses. Then solve the system and say what each number represents. Solution : Step 1 : John rented a car for 4 days, drove it 160 miles, and spent \$120.So, we have 4x 160y and 120Step 2 : David rented a car for 1 day, drove it 240 miles, and spent \$80.So, we have x 240y and 80Step 3: Solve one equation. Choose one of the equations of, say x 240y and 80.Solve for variable x in terms of y. Subtract 240y on both sides. (x 240y) - 240y (80) - 240y80 - 240yStep 4 : Replace the expression for x in another equation and solve.4 (80 - 240y) 120320 - 960y and 160y and 120Combine as terms. 320 - 800y - 120Subtract 320 с обеих сторон -800y -200Divide обе стороны -800(-800y)/(-800) - (-200)/(-800)y 0.25Step 5 : Замена значение y мы получили выше (800)y 0.25) в одно из уравнений и решить для другой переменной, у:х/й й й 548202 й й 548Subtract 202 с обеих сторон. x No. 20 So, system solution (20, 0.25). Step 6 : Interpret the solution in the original context. Thus, Hertz Car Rentals rents cars for \$20 per day plus \$0.25 for every mile drive. Aside from the things given above, if you need any other stuff in math, please use our google custom search here. If you have any feedback on our math content, please give us: v4formath@gmail.com We always appreciate your feedback. You can also visit the following web pages on various things in math. The ways in which the sheet can help your child learn have a direct impact on your child's growing educational efforts. As long as you give them a system that they can practice and learn, they will be able to learn how to solve problems and solve their own learning process. When your child has a system to study, they will be able to think faster and solve problems when it comes to solving Word Problems Worksheet equation systems. They will also be able to work at their own pace and not be disappointed when they can't figure out a solution right away. There are many families who use sheets with their children to help them practice and learn, so that they can have an easier time with their learning. The Equation Systems Word Problems Sheet Also Inequality Word Problems Leaf Algebra 1 Answers Best solvingA System Equations Word Problems Leaf is very simple and easy to understand. It is a learning tool that can be used by your child for practice and learning, even if you do not have the same basic knowledge as them. You can take advantage of the benefits you can get from using a sheet when you teach your child to learn. When it comes to using the Word Problem Sheet equation system, your child will find that the information they are learning is easier to understand. It will also be more enjoyable for them because the techniques they practice are very creative and they will have fun when they work on a problem solving section. They will also reluctant at their own pace because they will use a system they can change as they get to higher levels of understanding. This is why so many families use the sheet to teach their children to learn. Word Problem Leaf Equation System is a great way to introduce kids to how to deal with algebra and other high school math problems. You can use it as a great start to teach them different types of problem-solving skills. Children may become more interested in math the more they learn about it. There are many different reasons why a child might want to use a sheet that teaches the equation system Word Problems Leaf. First of all, it can be a way for them to learn how to work with something that they are already interested in. Equations Word Problems Leaf or Systems Systems The three variables of word problems is the NewA Leaf Leaf, which teaches the System of Equations Word Problems sheet can also be used to help your child to learn to prepare for their college courses. They can learn about the exact methods they need to know to complete their college courses and ways that they can save money on college when they go to college. There are many families who have had great success in learning the exact methods that they need to be successful in college. A worksheet that teaches the System of Equations Word Problems Worksheet can help your child prepare for their future by showing them how to be responsible with their money and have a plan to be successful in college. You can start teaching your child to use the math system that they need to become successful in college by presenting them on a sheet that teaches the System of Equations Of Word Problems Worksheet. If you have a little time, you can use this system and use it to help your child learn and develop his creative side.
