If there is one feature on WhatsApp that is highly anticipated by all users around the world, then this is WhatsApp Dark Mode. And WhatsApp recently rolled out the dark mode feature with WhatsApp Beta 2.20.13. The update is available on the Google Play Store, and if you subscribe to WhatsApp's beta program, you'll be able to check out the new update. What's great is that this is the first time WhatsApp has released an update that has reached a large number of users, unlike select users, as is usually the case. As part of the latest WhatsApp Dark mode, it's called Dark and you'll find it in the Theme option on WhatsApp. This will make the entire user interface of the platform dark, including home screen, settings menu, status, chat channel, etc., a combination of dark green and various contrasting shades. SEE ALSO: WhatsApp reaches a peak of more than 5 billion downloads on the Google Play Store Here's how you can turn on the dark mode on WhatsApp to check the dark mode on WhatsApp, you can do it either in one of two ways: Be part of the Google Play beta program or sideload TheWhatsApp beta v2.20.13 APK from APKMirror. If you're part of the Google Play beta, you can easily download the latest Beta Version of WhatsApp. After that, follow the steps below to experience WhatsApp Dark Mode: Step 1. Open WhatsApp, click on the three-volume menu, present in the top right corner of the screen. Step 2. Select Settings from the menu and click on the chats. Step 3. Once you've made a choice of chats, click on a theme where you'll be able to choose between the theme you want. Step 4. Here you have to choose a dark one that will allow a dark theme through the app. Step 5. What's great is that you can choose a system default option that will allow you to switch between dark and light mode depending on the settings of the system. SEE ALSO: Here's how to turn WhatsApp Dark Mode into Android and iOS The only suitable display for our dark time, and WhatsApp is finally caught on. On Tuesday, Facebook-owned WhatsApp announced the introduction of dark mode for iOS and Android. If you've made the right and correct choice and set the operating display settings in dark mode, WhatsApp will mimic this setting in the app, too. Looks pretty cute. Sasha is too busy to react, even in dark mode. iOS 13 and Android 10 users who update WhatsApp to the latest version should have access to the changes. Android 9 users can turn on the dark mode by stopping by in WhatsApp Settings for a zgt: chats of the theme and then selecting Dark. I, along with another Mashable reporter, had to update our apps twice before seeing the creepy makeup in the app. The update became available on Tuesday, but may not appear to all users at once. WhatsApp says it is rolling out in the coming days. WhatsApp says it debuted dark it was one of the most popular features from users. It is designed to reduce eye strain and prevent phones from embarrassing lighting in dark spaces. Dark mode fans rejoice - although the dark mode is not officially available in the latest beta of WhatsApp, WABetaInfo has worked some magic and got some practical time with the new user interface mode. We have heard rumors about the dark WhatsApp mode since September 2018. Of note that the dark mode of WhatsApp does not use absolute black. What you see in the screenshots below is very dark gray, which is actually lighter on the eyes than absolute black. Since the contrast between gray and white is not as stark as the contrast between black and white, your eyes will be easier to adjust to the gray background. The use of dark gray also offers the advantage of better readability. When the app uses absolute black, scrolling text and fast motions can look nervous on OLED displays because of pixels that turn on and off. With dark gray, every pixel and you don't see nearly as much fright when scrolling. Unfortunately, the dark WhatsApp mode is only observed in the settings menu. This means that we can't see WhatsApp dark mode for some time, especially since there is no official way to activate it in the latest beta. Beta 2.19.82 WhatsApp is now available on The Google Play Store. You can go here to subscribe to the beta. It feels like an eternity since we first heard that the WhatsApp team works in a dark mode. Fortunately, it looks like the company is ready to push out the feature for some users. WABetaInfo noticed the dark mode in the latest beta of WhatsApp (2.20.13) pushed into the Play Store and we can confirm that it is indeed available to us. Check out the screenshots below. The dark whatsapp mode uses dark tones instead of being completely black though, which is a bit disappointing if you're a fan of other apps with OLED dark mode. However, it should still be lighter on the eyes compared to the long-standing mode of light. But hopefully we'll see black mode in the near future, as it allows great battery savings when using a phone with an OLED screen. The current dark mode can either be manually turned on or you can have it follow the system theme settings if you are on Android 10. That is, WhatsApp automatically darkens when you turn on the system dark mode. Android Pie users and below can manually turn it on as well, or they can have it follow the battery screensaver (i.e. dark mode is on when the battery saver is turned on). Related: How to incorporate dark mode on WhatsApp anyway, the new color scheme applies to chat menus, page settings, call tab, contact list, and a number of other menus.
