But truecaller changed the whole script. Truecaller has introduced a new feature called caller ID. If the user has the caller ID feature installed and turned on, a calling card appears on the screen when the user receives calls. The card displays information about the caller. The menu displays the caller's name, address, and so on. However, there are many features in truecaller this feature made this application famous. Because of the caller ID, users can learn at least the name of the caller. Block spam Since there are thieves in the real world to steal personal items. In the digital world, information is also stolen. As the world has become digital, more feasible options will be introduced than net banking, UPI (Unified Payment Interface), etc. All these details are related to the phone is not. These facilities are created to provide users with a carefree experience. But for some evil hackers, spammers are also there to steal every piece of information they can get. These bad people make calls and scam users. To prevent this, truecaller has a fantastic feature called spam blocking. This function allows the user to receive a warning signal in the caller's caller ID. The warning sign indicates that the person calling is a fraud. You can disable spam caller with a single tap. This feature of truecaller prevented most users from scams. So if you haven't installed this app yet be sure to install it after reading this article. Chat, text, call in one place. As this app became more popular, it began to create its own secure and secure communication environment. Truecaller has introduced a new feature for users. Instead of different apps for chatting, messaging and calling truecaller all in one place. Now the audience was not required to switch to different applications to perform other tasks. Users initially hesitated to use communication environment by truecaller, but since this is a feasible option, most of the users eventually started using truecaller for messaging, chatting and calling. Organized Spam free Inbox Somehow truecaller managed to force users to use the communication environment. But why will users use it if there is no other extra feature. To resolve this issue, the truecaller suggested a spam-free inbox. Truecaller has solved the problem of spam calls. But through the messages, smartphone users received spam messages. To prevent users from falling into spam messaging scam, truecaller began to display spam messages on a red background. This sent a warning to users about spam messages. Banking and payment on the go If only truecaller is installed on your smartphone, then everything is ready to do anything without any hassle in this digital world.
