In 1956, a new armitron watch brand was launched, along with the founding of E. Gluck Corporation and the Anne Klein brand. The American Armitron watch owes its appearance to the company's president Eugene Gluck. It was only his idea to create a real national brand. His idea and desire were realized, after a while the watches of this brand began to gain popularity and confidently occupied their niche in the watch market. In addition, I can't help but note that this brand today entered the top ten best-selling watches in the North American market among brands such as Timex, Fossil, Guess, Seiko, Bulova, Citizen, Casio, Pulsar, Movado. Armitron models combine a unique and at the same time well-recognized style, high quality, reliability and convenience. We've selected 7 best-selling Armitron watches for up to \$50. 1. Men's watch Armitron 408231RDGY Chronograph Digital Sport Armitron 408231RDGY Chronograph Digital Sport This digital chronograph has a special masculine character. These men's watches remind everyone of the famous Casio G-Shock. These watches have features such as a chronograph, stopwatch, countdown timer, hour-timer, date mapping, day of the week, and battery indicator. The case of the watch and the strap are made in two colors. The main tone is black and bezel, some details are silvery. Inside the watch is Japanese quartz movement. The watch is 100 meters waterproof. The price of this model is about 25 dollars. 2. Mens Watch Armitron 408188G Chronograph Digital Sport Armitron 408188GMG Chronograph Digital Sport This model almost completely repeats the functionality of the previous watch, there are only changes in design. The design of the digital dial has been changed. Added a bright orange color, which animates this model and gives it a little freshness. The location and character of the display sample has been changed with additional parameters. The design also looks very bold, bold, charismatic and expensive. The price of this model is also about 30 dollars. 3. Men's Watch Armitron 408209 Chronograph Digital Sport Armitron 408209BLK Chronograph Digital Sport The next two-color chronograph, with basic digital watch functionality and good design. The set of functions of this model, although not rich, but useful and used almost daily. Waterproofness is also kept at 100 meters. The price of this model is about 20 dollars. 4. Men's Watch Armitron 408177RED Chronograph Digital Armitron 408177RED Chronograph Digital Sport Rectangular sports watches in the original red and black. The dial is large enough that time is easy to read while playing sports and does not detract much attention for reading time. The strap is made of black rubber and has the ability to be mounted on almost any wrist. The strap-mounted holes are made quite often. The dial is a little unusual, the main part of the LCD display, the background, is made in black, and the informative part is made in white. The watch is 100 meters waterproof and the price does not exceed \$30. 5. Womens Armitron Watch 456984PNK Digital Sport Armitron 456984PNK Digital Sport This model is strictly targeted at girls. This can be seen from the use of pink in the design of the dial and the watch case. The watch also has smooth, smooth lines. The design is elegant and neat. The combination of pink, silver bezel and black strap looks optimal and deservedly will give this model the glory of one of the best-selling. The watch has a useful second time zone function. The water resistance of this female model is lower than that of male sports models, and is 50 meters. And the price is kept at more than the available level of \$30. 6. Mens Watch Armitron 40/8251 Digital Sport Armitron 40/8251 Digital Sport This male model is perhaps the most brutal of all presented to your attention. Bright red accents, silver bezel, sharp edges and sharp shapes, all this gives the watch a sense of brute force and strength. Functionality remains the same, the second time zone and a set of standard features for digital watches. The waterproofness is 100 meters, as well as previous male models. The price continues to please and is only about 30 dollars. Armitron 752433BLK NOW Diamond Accented This female model is knocked out of the range of what was presented above. This elegant women's model has gained popularity among women all over the world, but in the North American market this model is especially popular and is the leader of sales. The watch has sleek curves and lines, and have a powerful eye-catching design for the beautiful half of our planet. The dial is made analog and has three hands, as well as a large white stone about 12 hours and replaces the index. The stone and arrows contrast perfectly with the black dial. The watch is perfectly readable. The watch looks very expensive and stylish. The bracelet can be adjusted by removing the links that ensures the comfortable wearing of this model, which is so important for girls. The diameter of the watch is 19.2 mm. The case and bracelet are made of metal and have protection from scratches. Inside the watch is Japanese quartz movement. Unfortunately, the water resistance of these watches is very small, they should be used carefully even when washing hands. The price of this model is 50 dollars. In conclusion, I To say that for excellent design and good quality performance, the Armitron brand borrows quite modest money. Our article describes the most popular models. But in fact, there are a lot of them and you can find a model for each day, while the purse will not lose much weight. How do you set the time on your Armitron Pro-Sport digital watch Need to know how something works and you've lost the manual? Get some of the guides here. To find guides in pdf formats, enter the style number found on the back cover of the watch. Please insert a style number. On the back of the Armitron watch, please look for your 6-digit style number. The style number should start with two numbers or two letters, followed by fast forward and 4. If you have trouble finding your style, please contact customer service for further assistance. Unfortunately, there is no PDF file for SKU. Please contact customer service: Please contact Customer Service: 1-866-631-0342 or (718)784-0700 support@armitron.com support@armitron.com
