Well, I needed one last week and saw a replacement was Kenko Smart Timer II. Any problems with them? 10-25-2007, 02:21 AM #2 Pope and Young Join Date: October 2006 Venue: Crosby, Tx Hunt In: Menard and Kinney County Moy Kenko used for the last 2-3 years of the summit. 10-25-2007, 12:16 PM #3 Pope and Young Join Date: October 2006 Location: Hempstead Hunt In: Carta Valley Guts Off The Print Board and Go on the moultree Digital Board that comes in a small folding black case. Cut the lid off the case and hook up the digital timer to the kenko feeder engine and you get the bullet proof engine body with half the way decend a reliable digital timer. Any timer will work if it is small enough to fit in a shelter. Check with ultrakar! and see if he has something for you, it's great. The enclosures on these Kencos are ok, but I hated the photovoltaic eye part so I trashed it. I have been using this feeder for over 10 years and it will be strong in Mason right now. 10-25-2007, 01:57 PM #4 Ten Point Join Date: October 2006 Place: Austin Hunt In: Gillespie I agree w/Howard... did the same, but ended up using BA Systems Timer. The only problem with ID is that there is no good way to connect the solar panel. This is the only feeder I have that doesn't have a solar panel. 10-25-2007, 08:06 PM #5 Six Point Join Date: October 2007 Location: San Marcos Thank You All! 10-25-2007, 09:28 PM #6 Ten Point Join Date: October 2006 Place: Georgetown Texas Hunt In: Mason/Williamson Cnty. My Smart Timer II has been in use since 1994 and still throwing corn every day at Mason! It goes away twice a day in perfect unison with my digital feed! 10-25-2007, 10:38 p.m. #7 Six Point Join Date: Oct 2006 Location: Brian, TX Hunt In: D'hanis, Edge and Frenstat Tx My smart timers aren't too smart 10-26-2007, 05:51 AM #8 Ten Point Date Join: Oct 2006 Location: Whitesboro, Texas Hunt In: TX, OK, KS. Great Timers.... Imho... I've got three of them. 2 of them I bought about 5 or 6 years ago. The third one was thrown out by my neighbor. The barrel, the engine, the legs, and all because someone shot holes in the barrel. I know it's been at least 5 years then, and I've been using it for almost so long, so it should be about 10 years old, I think. All I did was put a battery in it. All 3 of my Kenko go twice a day, every day. If you decide not to use Kenco's, let me scream. I'll take them off your hands! Here's I got trashed by Kenko last week..... Good luck w/it..... Digital Deer Feeder Replacement PC Tip Part Kenko V V. Works an economical 6 volt or 12 volt battery source. Feeder for With a timer. I bought one of these second hand feeders and the guy had no manual with instructions on the operation. It throws out the feed in three directions and you can presumably turn 2 2 spinners so that it is a directional feeder. I'm curious to know if anyone had one of them and if they could tell me how little selector switches work or copy this piece of operating instructions for me. Johnny #961269 - 10/13/09 07:23 PM Re: Kenko Tornado Feeder Issue No THF Trophy Hunter Registered: 11/05/08 Messages: 7675 Loc: TEXAS. I love this feeder. Got one I bought years ago and it worked great for years. Anytime someone from the lease needed a feeder because their was down, up went Kenko Tornado. Just ordered new paddles for mine. I've never heard of a selector switch. I think if you just put one battery in a unit rather than two, it would only run one engine - I guess. Don't hold me to this until you check it out. The truth is that you can install a device to throw in for such a short period of time, you don't spend that much corn. In addition, the three engines running like the county's wide lunch bell. #975270 - 10/20/09 02:51 PM Re: Kenko Tornado Feeder Issue : 11/10/08 Messages: 99 Loc: Austin, Texas.
