One of the best ways to scan documents is to use a smart device camera, which, while cost-effective, provides a scanned version in no time, sometimes at the center of these scanned documents or some text documents. There are things we need to get and save! In this situation, a text scanning tool may be the best option. OCR Text Scanner Pro: Transforming Image into Text Pro is a smart app for quick text scanning on images for Android devices developed by Rishi Apps and released in google Play Marketplace. If you want to explain to your loved ones the easiest way to do this, it can be seen as a document scanning tool, so you just need to put the camera on the document or tab you want, or view the scanned version and select it from the gallery; that everything is fully automated and professional, and all text in the pictures is removed. The app has many features, including high accuracy, more than anything else, making it easy to identify 95 to 100 percent of texts and easy to blink. They are stored as a text file. Each scan doesn't need to select the entire image and you'll be able to select and trim the only part you need to get the exact text you want. Just note that this software does not recognize handwritten text. What's new!v1.6.8 1. Multiple images of the package. 2. Error fixes and performance enhancement.v1.6.7 1. The text language in the image is automatically identified. 2. User interface changes and performance enhancement.v1.6.4 1. There is no need to download or install language packages. 2. Gave support for more languages. 3. OCR accuracy has been improved. 4. Fix bugs and improve performance.
