Calling a recorder pro app works on your phone like:Samsung Galaxy S20, S10, S9Samsung Galaxy Note10, Note9Samsung Galaxy A30, A20, A10Samsung Galaxy J7, J6, J2LG V50 Thin, V40 Thin, V30, Stylo5Motorola g (8), moto g(7), moto g(6), moto g(5), moto g(4) etc. One of the most underrated features of the smartphone is the ability to record voice calls. While some of the OEMs like OnePlus, Xiaomi and Huawei make sure to include this feature on their Android build, it is not available in the Android warehouse. For me, recording a call is a very important feature, as it helps me save important conversations that I might want to address later. It also makes it easier for me to discuss my ideas with colleagues on calls as I know that everything we brainstorm safely persists on my If for these reasons or for your own reasons, you need to record calls on your Android device, there are some really good apps present on the Play Store that allow you to do just that. Note: Since most of the apps on the list have almost similar similar don't forget to download apps only from the links provided. Also, recording a call is illegal in some countries like the US, so be sure to check your country's status before downloading and using any of these apps. The best call Is Recorder Apps for Android in 2020 Before we get to this article, let's first make a few things clear. After the Android Pie update, Google severely restricted the recording of the call. This makes it difficult for apps to record calls clearly. In our testing, Cube Call Recorder was the only app that worked flawlessly on Stock Android, OnePlus, Xiaomi and other phones that we tested it. The app even worked on Android phones running Android 10. As for other apps, some have worked on the Android stock, some on Samsung and some on OnePlus. So the bottom line is that you have to install the app and check if it works on your device or not. I suggest you start by using Cube Call Recorder ACR and then switch to other apps if it doesn't work. Also, be sure to provide any permissions given by these apps if you want to record calls. For a better recording experience, open the app settings and select Voice Recognition Software as an input option instead of the default Voice Call settings. Make sure to go through the app settings and customize it for a better recording experience. So now that you know what to do, let's get back to our list, right? 1. Cube Call Recorder ACR Cube Call Recorder ACR is the only app on this list that allows you to record not only regular phone calls, but also calls from various VoIP services including Skype, Viber, WhatsApp, Hangouts, Facebook, IMO, Line, Slack, Telegram and more. However, VoIP call recording is not supported on all devices, so you will have to install the app to see if the feature works on your device or not. The best part about this app is that it's totally free to use and doesn't offer any ads while recording calls. With Cube Call Recorder ACR, you get one of the best call recording experiences for free. Download: Cube Call Recorder ACR by Catalina Group (free) 2. Call Recorder - ACR Call Recorder - ACR is another great app that worked on almost every device I tested it. Just like an automatic call recorder, the app can track incoming and outgoing calls and record them without having to do anything. The best part about using this app is that it is one of those apps that just work. The app also supports several cloud storages, including Google Drive, OneDrive, FTP and WebDAV. Not only that, the app even allows you to directly send recorded calls to email of your choice. You can use the app for free with ads, or buy a pro version to remove all ads. Download: Call Recorder ACR by NLL (free / \$2.04) Note: For the best recording experience on Android 10 10 download ACR 32.9-unChained APK from APKMirror. Google does not allow this version of the app on the Play Store, so you have to download it to Google Drive. Other features include the ability to favorite recorded calls, search records, send calls via email, record a sign as important, and more. Download: Call Recorder from Top Weather Studio (free, in-app purchase) 7. RMC: Android Call Recorder RMC: Android Call Recorder is one of the most versatile call recording apps in the Play Store. The app not only allows you to record voice calls in MP3 and WAV formats, but also supports other formats such as AMR, MP4 and 3GP. The app automatically records all incoming and outgoing calls and allows you to sort and search call logs. It also has a built-in garbage folder that removes the fear of accidentally deleting saved calls. You can also customize different things such as recording channels (choose between mono and stereo), sampling speed and bit speed. It also supports cloud integration with Dropbox and Google Drive. The app is completely free and is supported with ads. Download: RMC: Android Call Recorder by Coconatech (free) 8. Automatic Call Recorder Automatic Call Recorder is one of the best call recording apps that you can download and use now. I used the app on several different devices and it worked flawlessly on all of them. The app allows you to record any number of calls. It also gives you three different modes for automatically recording calls. You can record all calls, record calls only for saved contacts, or record calls to numbers that aren't stored in your contacts. The app also has decent integration with DropBox and Google Drive, so you don't have to worry about running out of place on your smartphone. At the top of it all, it also has a beautiful dark mode. You can use the free version of the app with ads, or buy a pro version that removes ads completely. Download: Call recorder from Appliqato (free / Pro-\$6.99) 9. All Call Recorder Lite 2020 is another call recorder app for your Android device. This is one of the easiest apps on the list and packs only basic features. The app allows you to record incoming and outgoing calls and has an audio player that you can use to play recordings. Additional features, such as search and sorting, cloud storage support, and moving files to an SD card, are not supported. If you are looking for a lean and easy app to record phone calls, this is the one to get. Download: All Call Recorder Lite 2020 by Electro Developer (free) 10. Blackbox Call Recorder Blackbox Call Recorder is a great app for recording calls for Android, which can be used to record calls. First of all, I like that it uses a dark theme that should be the standard for every app in 2020. Speaking of features, Blackbox Call Recorder records your call automatically, so you don't need custom input. All call records are reliably backed up in Google Drive. The app also comes with a security lock feature that prevents unwanted staff from accessing the call recording history. Other features include the ability to hide records from other apps on your phone, automatic cleaning of old records, Bluetooth headphone support, Dual SIM support and more. Overall, it's one of the best, if not the best record-calling apps for Android. Download: Blackbox Call Recorder from CRYOK SIA (Free In-app Purchases) Note: The app has problems for devices running on Android Pie and above. But I am sure that it will be updated to address these problems. The best app to record a call for Android in 2020 you never know when that moment will come when you will curse yourself for not having a call recording feature on your smartphone. Since most of the apps mentioned in this list offer a free service (supported with ads), it won't do you any harm to check those apps, and keep the one that works on your device. Conversely, if you're already using an app that works great for you and not on the list, share it with us by dropping its name down in the comments section below.
