help you do that. ... More definitely the best guide to North American birds. --Guy McCaskey, The Birding Edition of Sibley's Guide to Birds, the first edition is guickly created by David Allen Sibley as the author and illustrator of the nation's highest and most comprehensive guide to birds. Used by millions of birders from beginners to the most experienced, the Sibley Guide has become the standard by which natural history guides are measured. The long-awaited second edition builds on this foundation of excellence, offering massively enhanced and updated information, new paintings, new and rare views, and a new, elegant design. The second edition of this beautiful, flexible volume offers Improvements and updates: - All illustrations are reproduced 15 to 20 percent more for better detail, - Includes almost alm and voice description for each species and more tips for finding birds in the field. - More than 600 new paintings, including illustrations of 115 rare species and additional paintings of common species and regional populations. - More than 700 updated range maps showing winter, summer, year-round, migration and rare ranges. - 85 pages of family birds are being cross-referenced to the kind of account. Revised taxonomic order and the most relevant common names for each species. The Sibley Guide to Birds, the second edition, brings david Allen Sibley's genius to the world once again in a thoroughly updated and expanded volume that every birder should own. I am David Sibley, author and illustrator of Sibley Guides and other books (and now apps as well) about birds and painting as a way of exploring nature. Simple observation always leads to new ideas and new discoveries, and one of my greatest pleasures is to learn new things about the natural world. In my books I try to convey some of this knowledge - as well as the wonder and joy that I have experienced over the years - to help others gain a deeper understanding of the world around them. Thanks for visiting, and happy birding! This summer (June and July 2020) I've been birding around my local area in Deerfield, Massachusetts, and although I've lived here for three years, every day still brings new discoveries. A recent morning produced ... More This entry includes one song by Cerulean Warbler and one of the black-throat blue warbler. Can you tell them apart? Songs by Cerulean Warbler and Black-throated Blue Warbler and Cerulean Warbler on the song are usually not too difficult, though ... More I'll be appearing at a few virtual events in the next few weeks, celebrating the publication of my new book What's Being a Bird. I hope you can connect with one or more of them! RELATED, April 29 at 7pmPutsburg Arts and Lectures, Pittsburgh, PALink: Thursday, May 7 at 8pmMagic City ... More Order Signed Copies Now You Can Order Signed Copies of What It Is To Be from my local independent bookstore, the Odyssey Bookshop. Just click on the link to get information and place an order. Events and interviews my NPR interview from the Weekend Edition is now online on WGBH, along with an extended 23-minute ... More I've worked with Audubon to produce some drawing lessons for their kids activity pages these days when we could all use some enrichment. The last installment is a screeching owl, and here's the time lapse of the animation in just a 5-minute process. You can see all the videos as well... Read more about the road page in what it's like to be a bird. You can read the text from this page on my publisher's website (link below) My newest book becomes available April 14, in bookstores all over the world. You can read a little more about this on these links: here in my online storeA excerpt is available on... Read more The most useful frequently asked questions you will find more frequently asked questions listed on related pages. Let me know if you have other issues that are not covered yet. They are all the same (with one exception). Sibley's bird and tree quides have only one binding, called flexible. It is a flexible cover, thicker than a typical paperback and extends beyond the edge of the page. It's intermediate between traditional paperback styles and hardcover, and many sellers list it as one of these two categories. No matter how it is listed, all copies for sale have the same flexible cover. The only exception is the Sibley Guide to Bird Life and Behavior, which was originally published in hardcover binding but is now being marketed as flexibound. Books that are sold directly through this site are always signed and can also be personalized according to your instructions (e.g. John James, Happy Birthday!). At checkout you will see a box where you can enter any special instructions for the inscription, and I will take care of it before you send the books. To see the list of books that are sold through this site click here. (The prints are also sold directly here and they are all signed) If you want a signed copy of a book that is not for sale here, the easiest way to check my schedule of events and contact the bookstore at one of my upcoming events. Most stores will be happy to accept your book order with inscription and delivery, and I'll sign the book when I'm in the store. If you already have a book and would like to sign it, you can catch up with me personally at one of my events and I will be happy to sign it. These books share the same illustrations and maps, and very similar text, differences mainly in the size of books and species and variations. Summary: A great guide is more of a guide and is recommended when you want to have access to all kinds and as much information as possible about each species. Smaller eastern and western guides are faithful Guides are both recommended when you want a more portable size and book that focuses on the kinds and variations you are most likely to see. Size: Eastern and western guides are much smaller. At just under 5 by 8 inches, and under 1.5 pounds, they will fit into many pockets. Big Sibley is 6.25 by 9.75 inches, and almost twice as heavy at 2.5 pounds. It fits in a large jacket pocket, but usually must be held in a backpack or other bag. Some of the benefits of a larger sized big bird guide is that the cards are larger (about 10%) and illustrations are larger (variable, but up to 20% or more) and there is room for more illustrations and text. Species included: The Grand Guide covers more than 900 species - all of the regular species that are missing or very rare in the region. The Western Guide includes about 715 species and the Eastern Guide includes about 650 species. Options included: To make room for all these species in a smaller format, eastern and western guides include fewer images of each species that are rare in the region have very limited coverage with only one to three illustrations, and even many common species have reduced the number of illustrations, with some subtle or rarely seen variations dropped. Differences in status or other characteristics, but in some cases the text has also been rewritten to reflect different identification problems in each region. Some text simply did not fit into smaller books and was cut (for example, voice descriptions are shortened), and side essays on different topics are slightly different among the three books. The revised eastern and western field guides were published two years later than the great guide, and include several species introduced by exotic birds that are not included in the great guide. They are mostly found in Southern California and Florida: Pin-tailed Whydah, Bronze Mannikin, Orange Cheeks Waxbill, and cinnamon-rumped seedeater, and Japanese white eye.
