February 12, 2018 - 8:19 p.m. #1 PA.com in PDF-XChange editor VESION OCR? Is the PA.com version of the PDF-XChange editor version with OCR? I compared its file size to a portable version of PDF-XChange magazine with OCR. The PA.com version has a significant File size. So, I just wanted to confirm whether or not this is an OCR version. Text documents are usually for compiling and editing, but it's not the same when processing PDF files. They are preferred for their their security and the ability to het different types of content. In this regard, the PDF-XChange Portable Editor comes in as a powerful PDF editor who bundles various features to work on existing documents and save with new changes. File support and viewing options Files must first be downloaded to be able to use any features. On the bright side of things, the app supports an impressive variety of formats other than PDF such as XMP, BMP, GIF, ICO, JBG, PBM, PGM, TGA, PCX, DCX, PNG, JPG, TIFF, EMF, RTF, DOC, DOCX, XLS, PPT, TXT, and several more. Every document you open is at the click of a mouse in your tab. View options make it possible to set up a page display to work more comfortably with options for individual or continuous pages. Thumbnails can be turned on for previews, rotation enabled, zoom helps analyze details, while the ruler makes it easy to measure specific items or better align objects inside the document. Content editing and exporting the contents of documents will use a decent set of manipulation tools. You can extract a few pages, and even replace them. You can also limit the editing of the content itself, with options for inserting and selecting text, adding images, barcodes, or drawing directly on a page using special brush and form tools. In case you're working at a freshly scanned pace, the OCR component tries to translate the readable text, which can then be configured with a built-in spell-checking tool. You can take pictures of documents and save as photos, as well as measure the perimeter, distance or area. Export opportunities are not plentiful, but make it possible to create a new PDF, or even a PPT file with all the changes you make. In addition, documents can be emailed or stored on SharePoint servers or cloud services such as Dropbox or Google Drive.
