Mati Kilp, Ulrich Knauer and Alexander Mikhalev: 529 pages, DM298.00, isbn 3'11'015248-7 (Walter de Gruiter, Berlin, 2000). The aim of the exhibitions is to present new and important developments in pure and applied mathematics. Well established in the community for more than two decades, the series offers a large library of mathematical works, including several important classics. The volumes deliver detailed and detailed exposures of the methods and ideas needed for the topics under consideration. They also pass on their relationship to other parts of mathematics. The series is addressed to advanced readers interested in a thorough study of the subject. Editing by Leo Birbrair, Federal University of Ceara, Fortaleza, Brazil; Walter D. Neumann, Columbia University, New York, USA; Markus J. Pflaum, University of Colorado, Boulder, USA; Dierk Schleicher, University of Jacobs, Bremen, Germany; Catrin Wendland, University of Freiburg, Honorary Editor of Germany; Victor. Maslov, Russian Academy of Sciences, Moscow, Russia. Titles in Planning include: Lev G. Kazarin, and Emmanuel M. Yumud, Characters of the end groups, Volume 2 (2019); Jorge Herbert Soares de Lira, Variation problems for hypersurface in Riemannian Manifolds (2019); Volker Meyer, Mariusz Urbanski and Anna Sdunik, Random and Conformal Dynamic Systems (2021); Ioannis Diamantis, Bostian Gabrovsek, Sofia Lambropulova and Maciej Mrochowski, Space Knot Theory (2021). Exhibitions aim to present new and important developments in pure and applied mathematics. Monoids, Acts and Categories: With applications to wreath products and graphs: Handbook for students and researchers; Mati Kilp, Ulrich Knauer and Alexander W. Mikhalev de Gruiter Exposition in Mathematics 29; Walter de Gruiter, Berlin, 529pp., 2000, ISBN 3-11-015248-7; Page 2. This article is in the 61st percentile (rated 55.108th) of 144,792 tracked articles of a similar age in all magazines and 1st percentile (ranked 1st) of the 1st age tracked in the same age Semigroup Forum. View more on Altmetric. Altmetric calculates the score based on the online focus that the article receives. Each color thread in the circle represents a different type of online focus. The room in the center is Altmetric score. Social media and mainstream media are the main sources that calculate the score. Reference managers such as Mendeley are also tracked but do not contribute to the assessment. Older articles often speak higher because they had more time to get noticed. To account for this, Altmetric has included contextual data for other articles of the same age.
