Heyday Wireless headphones to Bluetooth, then here we're going to discuss the steps you need. Simple steps to connect Heyday Wireless headphones to Bluetooth Here, you get to learn simple and effective methods that you can apply to connect headphones to your Bluetooth device. Step 1: Charging At the beginning, you have to connect the charging cable to the bottom of the left headphones. Next, you should connect the headphones to the USB adaptor. In another case, you can connect them to your computer. When the headset starts charging, you will see the lights start flashing. Wait at least 3 hours as the headphones take time to charge. Step 2: Choose your device here, first, you have to determine which device you are using. If you're using a computer (including a Macbook) and want to connect wireless headphones with it, then: First, if the charging cable is connected, then separate the headphones from the charging cable. Then go to the back of the right ear, then press and hold the power button for 7 to 10 seconds. Now you will see the light on the back of the left earpiece will flash red and after that, it turns white. You have to keep the name of the device as HEYDAY HEADPHONE 01. Windows 10 user, first, go to the bottom right corner of the screen and click on the Action Center button. After that, hit all the settings option. From there, go to the Device option. Now, from the left speaker, select the Bluetooth option and make sure Bluetooth is on. Windows 10 will then look for available devices. Once, find it, click it and also click on the pair option. Once the pairing procedure is successfully completed, the status of Para will appear on the screen. However, if you're using a Mac device, then, like the previous first, make sure that the left light of the earcup light will flash red and then white. In addition, the headphone device should be HEYDAY HEADPHONE 01. Go to the menu bar and click on the Apple menu. Also, choose System Preferences. On the next screen, select the Bluetooth option and make sure it's on. The Mac will then look for the pairing device and click on the Pair option after it is hugged. If you want to connect wireless Heyday headphones with your laptop. Then apply the same process that you applied for your computer. Smartphones: If you choose iOS, use steps and make sure that headphones are the name of the device HEYDAY HEADPHONE 01. Now, it's time to pair the device. However, depending on the iOS device, the theme and menu options may look a little different. Now, first, go to your device's Settings section. Underneath here, scroll down and choose the Bluetooth option. Then make sure the Bluetooth function is on. Next, you have to click on the Bluetooth device in order to be paired with headphones. If you're using an Android device, then apply the previous steps and make sure the name of the headphones of the device IS HEYDAY HEADPHONE 01. Then go to the Android Device Settings section and select Connected Device from the context menu. Again, make sure the Bluetooth device is on. You have to click on the Bluetooth device and pair it with Heyday headphones. The Heyday device will then be successfully connected to Bluetooth. Frequently asked questions 1.How can you reset heyday Wireless headphones? You have to press and hold the phone button on the remote control. On the headset, you need to hear the downward tones. After that, wait 15 to 20 seconds. Next, you have to press the power button for 1 or 2 seconds to return the headset. 2. Why are Bluetooth headphones flashing red and blue? The red/blue pairing mode flashes and you have to connect the device to the headphones. Normally, you'll see this light after power on (if you press the power button for more than one second). In this state, you need to hold the power button and turn off the headset. Wait a while and turn it back on.
