2Pi In the sequel to the trend of making automatic chat modes for lazy people, I released a standalone autogg now. Pretty much just explaining what he's doing, but if you really don't know, he'll say GG at the end of games to farm karma and pretend you're a nice person. Commands: /autogg - turns it on and off. Very complicated, I know. Video for ad revenue: I'm like 50% sure it's allowed, but apparently Plancke told @Sk1er he was allowed @Sk1er he has it @Sk1er his public fashion, so I'll just assume it's ok. If any admins want me to disable it, I download the chat triggers from an external source so that I can remotely disable it.
