Career or personal development courses (psychology, career planning, life skills, parent education, economics or AVID) 11. Pass the High School Equivalency Test: Located in the heart of Venice by The GED, HISET, or Keldean Hull 611 Fifth Avenue, Venice Technical Center (VSC) has been offering adult educational vocational training classes for more than 50 years. We offer low-cost career skills programs, free Second Language (ESL) English, and high school diploma/high school equivalent classes. VSC is one of 11 adult schools in the Los Angeles Unified School District's (LAUSD) Adult and Vocational Education (DACE) department. DACE is a national and state leader in adult education, where more than 130,000 students serve through vocational skills education this year alone. DACE also manages the nation's largest apprenticeship training program with 61 deals and 41 individual career program sponsors. VSC provides services to people who need to learn vocational skills to acquire a job, learn English, earn a high school diploma, and miss course credits for high school. VSC also helps students heal math and helps them become better readers. VSC Principal Melissa McCarthy is a community treasure because readers say the Venice Technology Center offers top-quality educational programs at a low cost. Some programs are completely free for adults. In addition, classes for concurrently registered high school students are always free. To support students' educational goals and unique schedule needs, many classes are open throughout the school year, so you can start at any time during the fall or spring semester. It makes sense to enroll in VSC to achieve your career and educational goals. We have a 50-year history of supporting thousands of adults and high school students in their communities each year to achieve their education and career dreams without incurring financial support debts that come with their lives, family life, and often other secondary schools. McCarthy and Deputy Director Elizabeth Penuela Teachers must have high qualifications and hold national educational credentials. Teachers personalize their education in a small learning community environment. We want more community members to know about our programs at VSCso we are actively providing marketing to the community for all educational and career training opportunities available at local adult schools. Young adults and adults who spend thousands of dollars in private career training facilities are in debt and don't have the skills they need to succeed in the workforce. VSC provides the highest quality education and education at a fraction of the cost of private schools or local universities because we are public adult schools funded in taxpayer dollars. Most educational programs can be completed in a few months, unlike the years that are important for adults who want to secure a living wage and start a career. Some of the career skills programs offered by VSC include dental assistants, pharmacy technicians, cybersecurity, graphic design, computer operators, building and ground/day porters, customer service, video production, network control operators, administrative assistants, accounting (including QuickBooks) and early childhood education. Each program is designed to help students acquire skills learned at VSC and build a profitable career once they have completed their education. Penuela empowers learners in pursuing academic, career, and civic goals. We work with local partners such as the Community College District, the Los Angeles Department of Economics and Workforce Development, and local employers to ensure that all learners are successful in the global marketplace. Fully qualified educators who are experts in their fields help create an environment that encourages students to exceed their expectations. According to Penuela, we produce highly trained and knowledgeable students who personalize their education and successfully enter the workforce and prepare a bridge to higher education. Principal McCarthy said VSC is dedicated to the educational success of each student. We want to work with students and communities to invest in educating and educating people to meet both current and future needs and to build a strong workforce. Our learners come to us with unique and diverse educational needs, and it is our goal to meet the needs of all students, Mr. Penuela said. We believe that everyone deserves the opportunity to improve their lives. For more information about the classes vsc offers, call 310-664-5888 or 310-258-2021 or visit www.veniceskills.org. To register, visit the Venice Technical Center directly or register online: Focus/Application/Staff Writer July 31, 2019 School directories and related public, and school district data files (collectively known as directories) contain information about California schools, districts, and district administrators, and provide public convenience with information that the California Institute of Education (LEA) voluntarily self-reports to the California Department of Education (CDE). Because the information is voluntarily self-reported, the directory does not contain information about all LEAs, and the information in the directory may be outdated or may have errors, omissions, typographical errors, and other inaccuracies. Therefore, if the directory does not have any information or information, it should not be relied upon for any purpose and should only be used to contact the LEA. CDE does not make explicit or implied representations in relation to directory information. For information on LEA certification, visit the U.S. Department of Education's Certification and Quality Assurance web page. At the East Los Angeles Technical Center (ELASC), part of the Los Angeles Unified School District's Adult and Career Education Department, we have been providing high-quality, low-cost education and education since 1966. Students can prepare for a new job, earn a high school diploma or HISET, learn English, or upgrade their skills for an existing career. The East Los Angeles Technology Center will help you plan and meet your goals. We empower you by providing fast learning opportunities: short-term, hands-on real world, and training in high-demand careers; Acquire English (ESL) language; High school diploma or high school equivalency certificate; And switched to college.
