The measurements built into these watches are not intended to be used in measurements that require professional or industrial precision. The values produced by this watch should only be seen as fairly accurate representations. CASIO COMPUTER CO., LTD. is not liable for any loss or any claims by third parties that may result from the use of these watches. General Guide - Click C to rework the mode on the mode. In any mode, press L to light up the display. Click C. TimeKeeping Mode Timekeeping Thermometer Month - Day of the Week Seconds Hour : Minutes PM Indicator Set Digital Time and Date Seconds DST Temperature Unit 3. When the setting you want to change flashes, use D and B to change it as described below. Screen: To do this: Reset seconds to 00 switching between daylight saving time (ON Specify UTC differential Change of hour or minutes switching between 12-hour (24-hour (Change of year Change of month or day - UTC differential range setting is from -12.0 to 14.0. In a 0.5-hour unit. Tempering temperature sensor: Temperature Unit Thermometer: Thermometer 4. Push A to get out of the screen setting. 12-hour/24-hour timekeeping format, selected in timekeeping mode, is applied in all modes. When the DST is included, the range of the UTC differential installation ranges from 11.0 to 15.0 euros in 0.5-hour units. Stopwatch Modes This watch has two stopwatch modes. And dates. This watch has a separate digital and analog timekeeping. The procedures for establishing digital time and analogue time vary. Read more about the thermometer in the Thermometer material. Installing digital and dates This watch is set with differential UTC values that represent each time Around the world. Before you set a digital time, be sure to first install a UTC differential for your home time, which is the place where you will normally use the watch. Note that World Time is displayed based on the time and settings of the date set up in timekeeping mode. 1. In timekeeping mode, hold A until seconds start blinking, indicating the screen settings. Be sure to set up the correct UTC differential for home time before you set up any other timekeeping settings. Cm. UTC Differential / City Code List for information on UTC differential settings that are supported. 2. Click C to move the flashing in the sequence shown below to select other settings. UTC Hour Minutes Differential Temperature Sensor Day Callibration Do this: Click D. Click D.) and Standard Time (OF) Use D (l) and B (-). Use D (me) and B (-). Click D. 12H) and 24H) timekeeping Using D (l) and B (-). About this guide is World Time Mode Daylight Time Mode (DST) Setting daylight saving time (summer time) advances the time setting one hour from standard time. Remember that not all countries or even local areas use daylight saving time. Switch the digital time of the timekeeping mode between the DST indicator and the Standard Time DST On/Off Analogue Time Installation procedure below when the time specified by the analogue hands does not correspond to the time of the digital display. To adjust the analog time of 12/24-hour format - to record the movement of high-speed hands, hold the D to start it, and then press B year to block. Hands will continue to advance during one 12-hour cycle or until you press any button to stop it. High-speed hand movement will also automatically stop after 12 hours or if an alarm (daily alert, hourly time signal, or Beeper countdown) begins to sound. 4. Click A to get out of the settings screen. The minute hand will be slightly adjusted to match the seconds when exiting the set-up screen. To return to timekeeping mode, click C. - When the past time, which is stolen by one of the stopwatches, exceeds 99 hours 59 minutes 59.99 seconds, the time displayed returns to all zeros, and from there the measurement of time continues. The measurement of the past tense continues until you drop it to all zeros. All operations in this section are performed in stopwatch modes that you enter by clicking on C. . For the sake of simplicity, display samples in this guide do not show analog hands of the watch. Depending on the watch model, the text of the display is displayed either as dark shapes on a light background or as light shapes on the Background. All display samples in this guide are displayed using dark shapes against a light background. Each of them this guide provides you with the information you need to perform operations in each mode. More information and technical information can be found in the Help section. The countdown mode of the timer 1. In timekeeping mode, hold A until the beginning of seconds to blink, indicating the screen setting. 2. Tap C once and the DST customization screen appears. 3. Click D to switch between daylight saving time (displayed) and standard time (4. Click A to get out of the settings screen. 1. In timekeeping mode, press the C six times to enter hand setting mode. 2. Hold A until the current digital time starts flashing, indicating the settings screen. Use D to customize your analog settings. Tap D once to propel your hands for 20 seconds. Hold D to propel your hands at high speed. The watch has two stopwatch modes: one stopwatch mode and dual stopwatch mode. Both stopwatch modes measure time in 1/100-second units during the first hour and in 1-second units after that. In both modes of the stopwatch, the time is possible up to 99 hours 59 minutes 59.99 seconds. Single Stopwatch mode (ST1) shows the total lap time and time for a single vehicle or runner. Dual Stopwatch (ST2) mode can be used to measure the past time for two vehicles or runners at the same time, including separate lap times and time difference between vehicles or runners. Data obtained in any stopwatch mode is automatically stored in the watch's memory for a longer recall when needed. ON is displayed). OF 1
