Arlo sets the bar for how good a good connected monitoring system should be. A simple operation in the form of a convenient app, a free basic package for recordings, wireless communication and weather resistance, so that devices can be installed even outdoors. Neatgear also offers a host of other custom models for a variety of purposes such as Arlo Baby and Arlo Go, as well as wired Arlo z. If you already have an Arlo Pro system and want to upgrade or supplement with a new camera, you don't need to get a new base station, it's back moving and just like before, you can connect up to five devices to a free base package. READ ALSO: Comparative test of the best surveillance cameras right nowAre you're a new user otherwise fitting as easy at any time. Connect the base station to the router, download the Arlo app, and then just follow the step-by-step instructions in this. You also register a user account, and you can also invite more users, such as family members, who can also access the camera system. The new Arlo Pro 2 has improved some compared to its predecessors, including a video resolution that is now at 1080p compared to the Arlo Pro with 720p. To be honest, the difference is negligible, as shown in the photos below. A certain difference in quality is noticeable when we zoom in on the image, but that's hardly a reason to replace existing cameras in your system. Above: Arlo Pro, subst: Arlo Pro 2 Each device can be customized individually in the form of video or sound

settings. Lower resolution provides better battery life and vice versa. When you set up a sound, you can turn the speaker or microphone on or off. Thus, the recording can be activated by movement or by recording sound. What the camera has to record is set under the setting of each camera, even if the siren must be activated at that time or not. The new also that the camera can record everything during all hours of the day and store it in the cloud service Netgear. However, this feature is not included in the basic package, but requires an additional service, CVR (Continuous Video recording), which costs 790KR/year for 14 days of continuous recording or 1,490KR/year for 30 days. Otherwise, it's like a timer in the basic package that files are stored for 7 days, the difference is that the recording is now ongoing until the 1GB space is filled, not like with the Arlo Pro, where there are 10 second clips saved. A clear improvement. With Arlo Pro 2, you can also choose which part of the image activates the recording and send push notifications that were not possible before. So you can exclude areas of the image, such as swaying the flag, which otherwise Constantly. A feature that we really lacked in previous models. If the camera is also connected to the se, a buffering of three seconds of pre-recording is also offered for recording, which is really good and improves the ability to enable the camera to be activated. Three generations: Arlo, Arlo Pro and Arlo Pro 2. Overall, the Arlo Pro 2 is better than its predecessor at one point, and this battery life has been reduced to three months compared to the previous six months before it needs to be recharged. Rating With a number of improvements, Netgear is consolidating its first place when it comes to home surveillance cameras. The Arlo Pro 2 is a little more expensive than its predecessor, but it is offset by new features and better performance (except for test time, then...) High Video Resolution Easy Operation Wireless and Weatherproof are compatible with Amazon Alexa, Google Home, SmartThings, Wink, IFTTT, etc. Costs some poorer battery than the previous model! Continuous video recording costs extraFacts Arlo Pro 2What: Wireless Surveillance Camera System Verified: January 2018 Manufacturer: Netgear Price: 2890 KRONOR (camera only), SEK 6,390 (base station and two cameras) on Kjell and The Company Connection: Wi-Fi : IEEE 802.11n Wireless Frequency Band: 2.4 GHz Video Resolution: Max 1080p Battery: Rechargeable, rechargeable, up to three months for charging Others: 2-way audio, built-in microphone, built-in speaker, IP65 rated, Night Vision. Dimensions: 7.93 cm x 4.86 cm x 7.05 cm Weight: 136 g Number of megapixels indicates how many pixels are in the sensor. 1 megapixel is 1 million pixels. The more pixels, the higher the potential image quality. Page 2A number of megapixels indicates how many pixels there are in the sensor. 1 megapixel is 1 million pixels.
