peptidebination enzyme is linked to a catalyst in a biochemical reaction that is usually a complex or conjugated protein fat, a lipid molecule consisting of three fatty acids and a glycerol (triglyceride) that is typically in a solid form at room temperature glycogen a storage carbohydrate in animal monoicaal a chemically signaling molecule, usually a protein steroid steroid, secreted by an endocrine gland or group of endocrine cells; acts to control or regulate specific physiological processes, a class of macromolecules that are nonpolar and insoluble in water macromolecule, a large molecule, often formed by polymerization of smaller monomers monosaccharide a single unit or monomer of carbohydrate nucleic acid a biological macromolecule that carries the genetic information of a cell and carries instructions for the action of the cell nucleotide a monomer of nucleic acids; contains a pentose sugar, a phosphate group and a nitrogenous base oil, an unsaturated fat that is a liquid at room temperature phospholipid an important component of the membranes of cells; consisting of two fatty acids and a phosphate group attached to the glycerol ridge polypeptide, a long chain of amino acids linked by peptide bonds polysaccharide, a long chain of monosaccharides; may be a biological macromolecule consisting of one or more chains of amino acid ribonucleic acid (RNA) a single-strand polymer of nucleotides involved in protein synthesis saturated fatty acid, a long chain hydrocarbon with some covalent bonds in the carbon chain; the number of hydrogen atoms attached to the carbon skeleton is maximized starch a storage carbohydrate in plants steroid a type of lipid composed of four molten hydrocarbon rings trans-fat a form of unsaturated fat with the hydrogen atoms neighboring the double binding opposite each other instead of on the same side of the double binding triglyceride a fat molecule; consists of three fatty acids linked to a glycerol molecule of unsaturated fatty acid a long chain of hydrocarbons that have one or more double bonds in the hydrocarbon chain Contributors and Attributions Template: ContribOpenStaxConcepts Template:
