If you have college aspirations, you can and should start planning for college during the first year of high school. You want to make sure that you are on the right track and have a solid plan in place to help you navigate the college process and eventually achieve your goals. In this article, I detail what to include in 9th grade college planning. Then I'll explain what you don't have to worry about yet. It's not too early to think about how to plan for college if you think 9th grade is too early to start college preparations, you're wrong. Some of what you do in 9th grade will affect your college statements and influence admission decisions. Many of my former students told me in high school that they wished they had developed good research habits or knew more about what they needed to do to get into college when they were freshmen. Also, if you have a mindset in 9th grade that you're going to college, you'll be much more likely to stay on track to achieve your college goals. Below, I set out five of the most important tips for 9th grade college planning. #1: Take the right grades when you start high school. You have to make sure you are taking the college preparatory curriculum. Talk to your counselor to make sure you are on a college prep track. In many schools, the math or foreign language class you take in the first year of high school will determine what level you will be able to reach when you are older in high school. Colleges will evaluate you based on the classes you have taken. If you have any aspirations to attend college, the most selective schools want to see that you are challenging yourself and taking some of the most difficult classes that are offered in your school. You don't have to take all the honors or AP classes, but to get into high school, you have to demonstrate that you can do well in the toughest classes. I recommend taking honors or AP classes on the subjects you are best at and the subjects you are considering college tuition. Here's an example of a good freshman schedule for a student who wants to be competitive for admission to elite colleges. Note that this is just a rough guide and you can take a more or less complex schedule depending on your skill level and the courses offered at your high school. Differences in geometry biology honors the English World History Spanish I PE Elective #2: Get good grades Believe it or not, your first year of classes matter for college admission. Colleges will look at your first year of class, and your grades in the first year will affect your school GPA and grade rank. Also, if you get good grades in the first year, you are more likely to get good grades in your sophomore and junior years. You will develop skills and habits that will allow you to continue to be successful. Learn more about how to get 4.0 and the best scores. Just because you're not doing as well as you'd like in your first year doesn't mean your college dreams are doomed, however. Undoubtedly, your sophomore and junior year grades are more important for colleges. #3: Participation in extracurricular activities In addition to your grades and tests, your extracurricular activities probably have the greatest impact on the quality of your college applications. Colleges, especially the best colleges, want their students to have exceptional accomplishments outside of the classroom, and they are looking for people who use their free time to pursue their passions. Some students believe that they should be comprehensive and make a ton of extracurricular; However, for college admission, it may be more beneficial for you to develop a thorn and exercise superiority in a particular activity or area. If you play sports, you can focus your energy on reaching the highest level in your sport and become a recruited athlete. If you succeed in math, you can use your time outside of school to practice and compete in math competitions. You must participate in extracurricular activities during the first year of secondary school. Colleges prefer to see a sustained commitment to your activities. It's more impressive to do one activity for four years and continue to show growth in this activity than to start doing a bunch of activities in your junior year. In addition, participating in extracurricular activities now increases your chances of gaining leadership positions or winning awards later in your high school career. Find out what to do if you are struggling to find extracurricular activities. Maybe you can join the basketball team. Image Source: David Holmes/Flickr #4: Beginning preliminary college studies when you're a freshman in high school, you don't need to know which college you want to go to. You don't even need to have a lot of ideas about which colleges you want to apply to. What do you want to study? What geographic region do you want to be in? You can play with college finders to get an idea of the different schools that can be good for you. You can also visit the local college campuses to see what they like and get a little taste of college life. If you have an idea of several colleges that might interest you, you can get a better idea of what you need to do to get admitted. Google PrepScholar (school name) admission to get admission rates, average GPAs, and average standardized test scores for various colleges. If you know the grades you need to get into different schools that help you stay on track. In addition, you can also go to college websites and look at their admission requirements so you know what classes you should take. It's beautifully beautiful if you are unsure at the moment what you want in college, and it is very possible that you will change your mind before you finish high school, even if you think you know where you want to go. Keep in mind, however, that it's good to start thinking about college in general and realize that what you do throughout high school will affect your college options. #5: This advice applies primarily to students whose parents have not gone to college or are not familiar with the college application process. Even if your parents went to college, it probably was a while and they may have concerns or concerns about your college goals. If your parents don't push you to go to college, you can let them know about your desires to participate. If you get them involved with your college planning, they may be more supportive and useful. Tell them why you want to go to college. In addition, many parents are worried about the cost of attending college. Some parents mistakenly assume that their children cannot go to college because they are unable to afford the full cost of the visit. You can direct them to our articles on how to save for college and financial aid. At this point, it is mostly important to know that finances should not be a barrier for you to attend college. Between grants, scholarships and possibly loans, higher education should be available to you, regardless of your financial situation. If your parents are pushing you to go to college or usually stressing you out about college, you can try to reassure them by letting them know you have a plan first. All of you can read this article and our other articles about college admission. If possible, try to get your parents involved in college planning. What doesn't worry about being a freshman While it's good to start thinking about how to plan college in 9th grade, you have to remember that you still have a considerable time to prepare yourself for college. Try to avoid stressing about college now. Your education and future are important, but so is your happiness and emotional well-being. Here are some specific aspects of planning for college that you really shouldn't be too concerned about in 9th grade: SAT or ACT You've probably heard of the SAT and ACT. Most colleges require you to pass one of these tests to get clearance. A higher score will increase your chances of getting into selective colleges. In 9th grade you don't have to actively prepare for these tests, but you can start getting to know them and the skills you need to acquire. The SAT and ACT mathematical section tests algebra, geometry and trigonometry. Chances are you'll need at least a couple of years of math school before you know enough to be able to maximize your score. In addition, your reading and letter letter that are tested on these standardized tests will improve with continued reading and the work you will do in your English classes. On the other hand, if you are interested in participating in a competitive summer program that requires you to submit SAT or ACT scores, then you should spend more time during the preparation of the first year. Even if you don't have to worry about these standardized tests during the first year, it's not too early to start learning from any SAT or ACT. You can prepare and take PSAT or PreACT. Learn how to study sat in the SAT/ACT as a ninth grader. If you start doing some consistent light test training early, you will be more prepared and relaxed when you take these tests during your junior or senior year, when your schoolwork will be more rigorous and you can work on your college applications. However, I don't think you should be too concerned about your standardized tests in 9th grade. Best College for You We get a lot of comments from 8th and 9th graders stating your desire to go to a particular college. While it's great to have goals and dreams, you don't need to know where you want to go to college in 9th grade. You have a few years before you have to start seriously considering the schools that you want to apply to. You may end up deciding to pursue another career path or change what you are looking for in college. There's nothing wrong with changing your goals or priorities as you learn more. At this point in your high school career, you should spend most of your time developing skills and qualifications to give yourself as many college options as possible. Perhaps you're suggesting that now that you're going to a local public college, that can't be too selective. Maybe its incoming students have an average GPA of 3.2. However, if in the summer before graduation year, you decide that you want to go to a more prestigious college in another region of the country, you will have a lot more options if you have a 3.9 GPA. If you can afford college While it's not a bad idea to save for college early, you shouldn't be too concerned in 9th grade with thoughts on whether you'll be able to afford to attend. If you're worried about the cost of college, you may start looking for and applying for scholarships, but many scholarships are only open to older students. Again, just realize that cost shouldn't stop you from attending college. Most students receive some form of financial assistance and do not pay the listed visitation costs. Also, if you succeed at school and end up with scores, you will be more inclined to receive merit scholarships and be admitted to colleges that offer the most generous financial assistance.
