Cara mirroring android ke tv samsung

Continue

As it turns out, connecting your phone to your TV is easy to do and has different methods such as gangs! Smartphones and TVs (TVs) are actually two different technological devices. As technology advances, the convergence of aliases merging between them becomes more apparent. If previously you just could opt out of playing on a rough mobile screen, now you're more likely to outsmart it by plugging PHONE to your TV to make the screen bigger. The way to connect it is pretty easy though! You can connect your Android phone to your TV with or without the use of cables, gangs. Want to know how? Here's how to connect PHONE to your TV to play games or watch movies! Look good, yes! As HP connects to the TV With the development of technology, even the basic functions of television can now be switched to other things like being an additional monitor for you to play games on HP. But, as it turns out, not everyone knows about it or even knows how to connect hp to the TV, the gang. That's why, here Xhaka will tell you how to connect your cell phone to the TV easily without or using a cable gang. 1. How to connect HP to a TV with a USB cable First Jaka will first start by connecting HP to the TV using microSD USB for HDMI or micro HDMI to hdMI cable. So for those of you who prefer how to connect HP to the TV with cable data can follow as follows jaka love, gang. Yes, before you go for the steps, you need a micro HDMI HDMI cable for that. If you have the hdmi type cable you need, and make sure it's compatible with your smartphone or TV, you can start trying to connect two devices. Just follow the following steps: Step 1: First of all, you need to turn off the TV that you want to connect to the phone. Step 2: Connect your Android smartphone to your TV with the hdmi cable that is already available. A small tip (micro HDMI) to connect to the smartphone, while the big end (HDMI) that will be attached to the TV outlet that says HDMI. Step 3: When you're installed, restart the TV you've previously turned off. Continue moving the channel to the HDMI option. Step 4: Switch to your smartphone, activate the HDMI Connection menu on your smartphone, checking the checklist of aliases on the options. Step 5: Your TV screen display is now the same as what's on your smartphone screen. In other words, the two devices are already interconnected, gang. Connecting HP to Plytron TV, LG, or any other brand is very easy to try, right? So you can play online games on Android just like you play on PS4! 2. How to connect PHONE to Without cable In addition to using cable help, you can also try how to connect your phone to your TV without wireless cable. This one is more practical, it's just that you need smartphone specs and a dedicated TV to do it. There are two ways to do this: use an external tool called Chromecast or use built-in miracast features from your smartphone. How to connect PHONE to a wireless TV with Chromecast Chromecast is a Google made HDMI adapter or key device that you can use to stream the latest movies, music, games and even Internet access on your TV. Chromecast has 3 features that work to connect your phone screen to your TV, namely App Casting, Casting Tabs, and Screen Casting. If you've connected Chromecast to a smart TV, you can immediately do the following: install the Google Home app on your Android smartphone. This app lets you control Chromecast. Directly aja download at the jaka link below. Desktop Improvement apps Google Inc. Step 2: Next, activate WiFi on your smartphone. Step 3: Switch to TV. Move the channel to HDMI with the TV remote control. Step 4: You will be asked to sync by entering the code that appears on the TV screen. Enter the code and instantly, your smartphone and TV will connect. How to connect HP to Polytron TV without cable or other brands is very practical to do. But, make sure the specifications of both devices are adequate, yes! How to connect HP to a TV without cable with Miracast Miracast or commonly referred to as a wireless display is a built-in feature in smartphones that allows you to connect HP to the TV screen with only a WiFi connection. If your phone already has Miracast or wireless display features, you no longer need to spend money buying Chromecast as the above gang. Here's what you need to do: Step 1: Make sure your phone already supports Miracast or wireless display features first so you can succeed when trying to connect your phone to a Samsung TV or another TV brand. Step 2: Next, turn on the TV and then in the options menu look for settings that work to include The Miracast/Screen Mirror settings. Step 3: Each TV brand has its own settings, like connect the Xiaomi phone to the TV, or another latest HP Android. So, look for information on Google on how to customize Miracast to match the TV brand you use. Step 4: After activating the Miracast/Mirror screen, your TV will directly scan the smartphone that activates the wireless display function. Step 5: Open your phone and then open the settings menu. After that, click on connection and sharing, select Cast. Step 6: Keep in mind, every HP brand has a way of connecting HP to sharp TVs without cable or other TV brands with its own Miracast settings, even if the differences are not significant. Step 7: Turn in the cast, then your phone will scan the TV that activates Miracast as well. Wait until the TV detects your phone or vice versa. How to connect your phone to a Samsung TV or another brand you can also try, especially if the device you are using already has Miracast, gang features. The benefits of connecting HP to your TV after understanding how to connect HP OPPO to your TV, or another HP brand, let's talk a little bit about what the benefits are if these two devices are connected. The benefits of connecting HP to an LCD TV or other type of TV include making the activity you're doing on hp more comfortable because you can do it on a wider TV screen. Events such as playing games or watching the best movies with friends and relatives will certainly be more fun if done on the TV screen, especially if your TV is already hd screen quality, or higher. Video: How to connect HP to Ahir Kata Well's TV, it was like connecting HP to a TV with or without cable. It's simple, isn't it? Now playing or watching movies becomes more fun after you can share the screen between your smartphone and TV. Good bye! Also read articles about Tech Hack or other interesting articles from Reynaldi Manasse. How to connect HP to a TV - An era of increasingly advanced change is happening, for example, from computer technology packed to smarthpone. A tool that is practical to wear only and multifunctional. Now HP has become one of the devices that are always used in everyday activities ranging from pednidikan, entertainment to work Even many people have difficulty to release this advanced device. If you're a teacher or an employee and want to make a presentation but don't bring a laptop, don't worry. Replace it with PHONE to start your presentation with a TV or projector. Why use USB to connect HP, tablet and TV?pixabay.comS ease and already many should mirror the screen hp wireless. You may be wondering why you should use a USB connection to your TV for your PHONE. If you connect your PHONE to a cable TV, you benefit from low signal delays. For example, if you plan to reflect your PHONE on your TV to play games, you want a USB connection rather than a wireless configuration. This significantly reduces the backlog. Also, in situations where you don't have enough Wi-Fi or you have a weak wireless signal, you'll need a wired connection. In the After all, there are many reasons to connect your PHONE to your TV. Read Read What is hp? You can use one of the following methods: MHL, for example, to connect your phone or tablet to your TV. Mobile High Definition LinkSlimPort USB Cable Lightning Cable (iPhone and iPad)Which route you choose, depending on the specification and operating system used, because the process of iPhone and Android is different, how to connect it.makeuseof.comE, your connection method varies depending on your needs. Simply viewing photos on compatible television requires charging cable and mobile device. But for a mirror image screen, you need a USB adapter. Method 1: How to connect YOUR PHONE to your TV with MHLMHL is one of the most common solutions for connecting HP to a TV with a USB cable. This technology, short for Mobile High-Definition Link, allows MHL-compatible devices such as smartphones and tablets to connect to TVs and projectors. The list of MHL auxiliary devices can be viewed on the official website of the MHL. What you need: HP, which supports MHLUSB for HDMI MHL adapter or cableShow with HDMI inputEable wiringEthing cableAlthing although this is a general setup, the specific cable you need varies. Google MHL Cable (your device name) to find a list of compatible cables.makeuseof.com To connect USB to the TV using MHL, first install HP through the mhl adapter. The adapter will require power either from the USB port to the cable or external source. This Samsung MHL adapter has a micro-USB port on the side for use with almost any cable. Some cables come with connectors for your PHONE or tablet and power sources in one unit. Then connect PHONE to your TV with an MHL cable. After that, you will see your PHONE screen on your TV, it is a plug-in and play. Overall, MHL is one of the best solutions for connecting your Android phone to your TV using a USB cable. Method 2: How to connect YOUR PHONE to your TV with SlimPortqoo10.sgOr, you can connect your phone to your TV with a SlimPort cable. Because MHL and SlimPort are technologies that present content from mobile devices to display with a physical connection, both are similar. But SlimPort is different in the way. While MHL is limited to HDMI video output, SlimPort can send signals via HDMI, DVI, DisplayPort and VGA. So it's more suited to a variety of displays, including old monitors and TVs with VGA, but no digital input. In addition, the power supply is even more distinguished by MHL and SlimPort. Although the MHL initially required a power connection, MHL 2.0 made it the most important. However, because MHL takes energy from mobile devices, it's ideal for connecting power cables. However, SlimPort does not receive energy from mobile devices. Here's what you need to provide, Connect PHONE to your TV with the help of SlimPort:HP is compatible with SlimPort (a list of devices with Slimport support (no longer available)SlimPort Cable or a video cable adapter (HDMI, DVI, Display, or VGA)Display with HDMI, DVI, DisplayPort, or VGA inputSLike using MHL, the SlimPort cable you choose depends on your device. Start by plugging a SlimPort adapter into your phone. Then attach the SlimPort adapter to the display with the right cable. Then you can watch the phone screen on TV. Like the MHL, it's a plug-in and play. Method 3: How to connect a tablet to your TV with a USBonikea.access.ly CableYou can connect the tablet (see the best cheap tablet) to your TV using a usb cable as well. For compatible android tablets, you'll use MHL or SlimPort. The process is identical to connecting PHONE to the TV. Ideally, your PHONE and tablet will be compatible with MHL or SlimPort, so you can use one adapter for both devices. Read also: How to fix a fast-running HP battery How to connect your iPhone to your TV from USBConnect your iPhone to your TV is similar to connecting an Android device, but you need a different cable. It's different from the model. Almost everyone will have a state-of-the-art iOS device (iPhone 5 or later) equipped with a Lightning connector. You'll need a Lightning AV digital adapter to display HDMI, or a Lightning to VGA adapter if you need a VGA connection. iOS devices with older 30-pin ports instead use a 30-pin VGA adapter. Once you've connected to the adapter, simply connect the output video to the display. The phone screen will then mirror. Apple's official Lightning adapter contains additional Lightning ports to charge when viewing content on the second screen. For example, by connecting your iPhone to your TV with USB, you can connect your iPad to your TV in the same way. Again, you most likely need a Lightning cable for this. Only the iPad 3 has previously used a 30-pin cable. All other iPads, including every iPad Mini and iPad Pro, use lightning cables. In addition, you will choose a digital AV adapter or VGA adapter. Which one you choose depends on your input display. USB on TV: Connect as storage Devicemakeuseof.com Although the most common case of use is to connect HP to your TV using USB to mirror the screen, there are other options. Instead of mirroring the screen, you can also view files such as photos on your TV. However, you need a compatible monitor, TV or projector. From different ways of connecting USB to YOUR TV, this is the easiest. Since it only requires HP, a USB cable, and a TV with USB input, it's easy to set it up. The specific cable you need depends on your phone. On your iPhone or iPad, you'll use Lightning (or 30-pin for older devices). In addition, Android users need a micro-USB or USB-C cable. The USB cable that accompanies your PHONE or tablet should work properly. USB to TV: Connecting to PhotosIni suggests that your TV or monitor uses a USB input capable of displaying files from a connected storage device. First, connect the cable to the phone. Now connect PHONE to your TV by connecting the end of a standard USB cable to the port on your TV or monitor. Then, change the input on the TV to USB so you can see it. On Android, it's likely that you'll need to change your USB settings to transfer files or transfer photos (PTP). To do this, drag the notification from the top of the screen down while connecting, and click on the USB that fills out this device notification to change it.makeuseof.commakeuseof.comI you can only see my photos using PTP on both LED TVs and my Spro 2 projector. Modern Android devices don't support a USB mass storage protocol, so the TV won't see your device as an actual external drive. How to connect Samsung PHONE to DeX TV Connectivity Among the most popular Android devices available, you'll find Samsung's flagship phone. It has a connection with televisions and monitors. For a clean mirrored screen you need a USB-C cable for HDMI. To connect the Samsung Galaxy S8/S8/Note 8/S9/S9/Note 9 to your TV, simply connect the USB-C adapter to HDMI. Connect the men's USB-C to the USB-C charger on the Samsung Galaxy device. Then launch the HDMI cable on TV.However, Samsung Galaxy S8, S9 and Note 8/9 devices also include DeX. Bridging the gap between HP and desktop, DeX offers a desktop experience to work with HP.Since this is an exclusive technology, the method of connecting HP Samsung running DeX to TV is different from the standard setup. For the entire Range of Galaxy S8 and Note 8, as well as the S9 and S9, you'll need a dock to use DeX. The Note 9 does not need a dock. Instead, the Note 9 is only included in DeX mode with a USB-C and HDMI cable. It's much more useful than a special pier. Similarly, the Samsung Galaxy Tab S4 can only use the DeX desktop mode with a USB-C cable to HDMI. Associated Samsung HP Running DeX for your TVFor Samsung device owners who are not blessed with the Note 9 or Galaxy Tab S4, you'll need a few items to connect your Android HP to the TV: Compatible SamsungCable deck/monitor devices or projectors with HDMI inputs your options for docking stations and DeX Cables vary. There is the original DeX station, which presents it with a round device with HDMI output, an Ethernet port, two USB 2.0 ports and USB-C. Samsung DeX DeX includes fast charging and form factors that can keep HP at the same level. This means you can use the PHONE touchscreen as a touchpad. Third-party manufacturers such as Rocketek also offer DeX Docks. Then you'll find a simple cable for DeX that avoids a large docking trail. Whichever option you use, connecting a Samsung device to your TV for use with DeX works in much the same way. First, connect a PHONE or tablet to a dock or cable via USB-C. Start the HDMI cable from dock to screen. You also need a power cord to power the dock and charge the device. Connect phone, tablet and TV with USB: Success! While USB to TV connections vary depending on the device, the type of connection and input of the display, fortunately it's not too hard to set up. However, don't forget that wireless casting is usually more convenient. Whether you're using an Android, iPhone or Samsung device running DeX, there's a way to connect a PHONE or tablet to your TV for watching on the big screen. How to connect your phone to your TV without cable Connect your phone to your TV without cable, you can use miracast or wireless display on your phone. Before you start, please check the availability of Miracast features on mobile phones and TVs. If your TV doesn't have this feature, you can buy a Miracast key or a receiver. How to connect your phone to a TV (Smart TV) of course varies. The following ways can match the TV you have:1. A TV brand that can be connected. LG Smart TVOn the remote control click Home Select then select the Menu NetworkOn when you click Miracast, activate or choose ON. Finally, the TV will do a scan, immediately activate Miracast on your phone or tablet. Samsung Smart TVOn the remote control click SourceThat select Screen MirroringThday the TV will scan other devices to connect. The scanning time is about 2 minutes. Finally, activate Miracast on your phone or tablet for up to 2 minutes. Sony Smart TVOn the remote control click INPUTUse the button up down to select a mirror image of the screen, and then click OK When the TV is in a waiting position, then at this time the TV is waiting for the smartphoe or tabletProcess to connect with the settings on the Android phone. Usually settings on your Android phone vary depending on which brand you use. No need to worry, here you get the full guide. Go to the installation stage on your Android.2 phone.
