The irony is that a smartphone is the perfect vessel for creating and storing this kind of audio, but the audience is admittedly small. This is a difficult topic to explore. There are some open source voice-changing engines out there, and the vast majority of voice change apps on Android use the same, so most of them do the same. However, there are some developers who have made some decent applications that can change their voice in different ways. Here are the best voice change apps for Android! AndroidRock Voice ChangerPrice: AndroidRock's FreeVoice Changer is an above-average voice change app. It supports dozens of effects, including bees, old man, Martian, fan, hoarse, drunk, underwater, and many others. It works like most voice change apps. You record some speeches and apply a filter. The app also allows you to apply filters to previously recorded audio files as well. It works about as well as you would expect. This one is free without in-app purchases. There are some ads, though. Baviux Voice Changer with EffectsPrice: Free/\$2.99Baviux Voice Changer is actually one of the most popular net voice changes on Android. Includes nearly four dozen effects in total along with a simple user interface and a host of other options. You can record audio and apply effects the way you want. After that you can send it to anyone (as long as the app supports audio files), set it as a ringtone or tone notification, and just save it. You can also import audio files if you want to change what you already have. The app works for \$2.99 for the premium version, and it's free if you use Google Play Pass.RoboVoxPrice:

Free/\$1.49RoboVox is a semi-decent voice-change app. This was recommended to us by one of our readers. This is one design feature that we are not huge fans of. However, we are quite enjoying the features. It has 32 voice filters that do everything from changing your voice pitch to adding different types of filters. You can also control the strength of each filter for different The app also has a voice recorder, the ability to save sounds like ringtone, parrot mode, and more. It all started with a few mistakes, but it seems to be doing a lot better these days. We're excited to see how far it gets.

SnapchatPrice: Free (with ads) Snapchat is by far the most popular voice change app. It's This. Image-sharing service. However, it has a bunch of filters. It can change your appearance, voice, and even the environment. It also has Snapchat Memories. This allows you to save snaps rather than losing them forever. This gives you the ability to record yourself making a blunt noise in strange voices rather than just making one-off videos for your followers and friends. The app is a massive battery leak and the iOS version is better. However, it is also free to download and use. There are ads, but you probably already guessed that. Voice Changer Handy Tools StudioPrice: Free (with ads) This voice change app is not half bad. It has quite a few decent if simple voice effects, including popular ones like old man, robot, alien, bee, and chipmunk (think Alvin and Chipmunks). It works like most others. You record your voice, add effect, and have fun with it. It also has some less silly effects like the karaoke reverb settings to add a little echo to your singing voice. The app is completely free with ads, but the ads are a bit annoying. We want there to be a good, cheap premium version to remove them.
