Don't forget to give us a 5-star rating :) I just downloaded it a while back and its good, I like the cartoon graphics that rly what I like and I also like that map a lot more now ! I hope you can improve more things like let's use our fist and punch people, we don't want to walk around with a gun all the time. Let's also change the radio stations, im still trying to figure out where the button is for it. And please make it optimized for the iphone 5. The graphics are very low, I hope you can optimize it ☺ i ladies 5 stars if you can all make it a big game, but whenever I try to climb to the roof of a small store, all the people and cars suddenly disappear, which is kind of annoying, and let the players change the radio station in the vehicles. Another thing to make the game more interactive is how to do robberies and stuff that would make fit the definition of the open world and optimize the game because sometimes lags and hangs, which is also annoying, please make it offline because I have to go to my house cousins that is very far and I have to wait just to play this game, so please make it offline so we can play either when there is Wi-Fi or not so pls make this game offline , and the game is actually awesome, the graphics, the animation is great, it's all great, but I hope you guys do it offline so we (all of us play this game) won't bother when there's Wi-Fi or no developer of the website Privacy Policy To Download and install old versions of the APK for Android Gangstar New Orleans apkGameloft.
