files with your colleagues or update documents from your mobile device. There's also the ability to view different types of files and enjoy full-screen quality. When you install Box, you get 10GB of cloud storage for free. You can add extra security to more sensitive files with file-level security controls. You can access your information and folders offline for added convenience. You can view documents and stored files using a real-time search tool. There is also an easy way to share large files with friends and colleagues. This is done through the link-sharing method. All you have to do is copy the automatically generated link and you're good to go. It's a versatile cloud storage program because you can save photos and videos too. The download speed is slow at times, but in most cases it depends on your network connection. Box is a secure, fast, and user-friendly system to manage important files wherever you are. If you have a phone, you have access to all your important information and folders at the touch of a button. Where can you run this program? This app requires Android version 5.0 and up. Is there a better alternative? No. Box is a reliable cloud storage system for Android phone users. DropBox works in a similar way, but with less space. Switching to cloud storage makes it easier to access files. Box is a safe and secure place to store your information. It's an effective tool and a top-notch folder management option while you're out of the office at any time. Should you download it? Yes. If you find yourself away from your desk and need critical information on the go, this is an effective system to use. Not everyone has time to consume sports content all the time. Get your dose of sport anyway. Listen to sports radio shows, read news or quick resumes of the game using only one app. Finishing game-by-game notes contact and box scores for with ESPN-Get the sports news you want and in real sports real stream you don't want to miss. Watch live sports on the app for less money with ESPN. The subscription will also give you access to sports features and other exclusives. In addition, you can stream to the app with your TV provider. You Read news and analytical articles about the NFL, NBA, MLB, UFC, and more on the app. With the feature, it will be hard for you to miss a beat with going-on in the industry. Of course, ESPN Sports News wouldn't be complete without the idea of your favorite writers and commentators like Adam Schefter and Ryan McGee. Mcgee. After hotly accepting ESPN personalities, you can also see game-by-game notes and box scores for more details. Choose the commands you want to hear about when you first launch the app, you'll be asked to choose your favorite teams. You can choose different teams to stay at the briefing from different leagues. The results and ratings of the team you've chosen are displayed on the homepage. This comes in handy when you can't afford the time to watch ESPN and stay glued to your screen. Don't worry if you feel like you haven't picked every team you want to follow. You can always add and delete commands later. Select mediumOther ESPN Media are offered on the free app. Their direct radio channels are for states like Los Angeles, New York, Chicago, and more. Basketball at the Center of The Lowe Post and Miami-based Le Batards Show with Stugotz are just two of the most beloved podcasts channel you can listen to. Where can you run this program? Use the app on any Android and iOS device. This requires a minimum of iOS version 11.0 or Android 5.0 to run. Is there a better alternative? If you want to read quick updates and glitches, theScore is the app that will give you just that. This allows you to share statistics with your friends as well. It's fast and easy to use. Ultimately, it comes down to which channel you prefer to receive sports updates from. If you get bored easily and the different forms of media excite you, this can be a match for you. Should you download it? Yes. Install the app on your phone and receive updates on your favorite bets today. Remind is a communication platform for teachers and students to talk to each other. Web software also has several useful features, such as sharing files and translating messages. This platform is designed for both offline and online teachers. As a teacher, you can send schedules, photos, files or even quizzes through messages to all studentsRemind acts as a social network for educational purposes. Professors can easily contact their students as well as their parents without having to request personal phone numbers or emails. The website can also tell you if all your students have received your message or if someone is missing it. Educators start by creating a class that can function as a group in certain social networks. this is where teachers message everyone in the classroom. The platform also allows you to send private messages to a student or his parents. This makes educational resources such as Powerpoint lessons accessible to each participant. Parents can also see your messages. All documents, spreadsheets and other files are available Files tab for everyone in the class to access. Integrated Platforms and Other Features Educational Platform also supports other resources to help you with class abilities. This includes a Google class that provide students with a course of work and their You can also use a monkey quiz and review for exercise or after-school activities. Another way to recall can help you is the translation feature. You can translate any posts on the site into some of the most commonly used languages, such as Spanish, French and Korean. This can help you understand what your students can say. It also allows you to communicate with people who can only speak a particular language. Where can you run this program? The Remind website is available through any browser. You can also use a mobile phone app that is compatible with android 4.4 or better phones, as well as iOS 10.0 and up. Is there a better alternative? A good alternative to Remind is Twiducate. A social media app that provides a private platform for both teachers and students. The app is compatible with Google Docs and YouTube.Remind fulfills its goal of providing you and your students with a social media platform for effective messaging and sharing. It also goes beyond its function with integrating other websites and platforms such as Google Docs. You can also contact international students or teachers with Remind. The only limitation of the site is the 140-character limit, which is similar to Twitter, before it doubled the character limit. Should you download it? Yes, a free account provides teachers with the tools they need to communicate and provide resources to the class. Apple Music is a great system, overshadowed by a terrible application with many errors. Songs will randomly get dropped from playlists, downloading music to play offline can be unreliable, and the app itself often crashes right without warning. More images Play and listen to your favorite songs on your Android with Apple Music.Apple Music allows you to access your Apple Music account along with your own music collection and enjoy it on your Android smartphone or tablet. Apple Music offers a collection of more than 50 million songs from its catalog. You can browse and stream the latest songs, get hand-picked personalized recommendations from music experts based on the music you love, and view the best music curated by the service's editors. The service also offers a radio-like system that allows you to discover new music and tune in to radio shows, interviews and more, either on Beats 1 or at stations made by Apple editors. You will also get to connect with your favorite artists by learning about their inspiration and effort with photos and videos as well as their music. Apple Music lets you create playlists in the app that's transferred to all devices. Can mix in your own local files with music from the service. Visit Tom's Guide for free Android apps and for the latest news and apps. And if you have any Android problems, check out the tips on the Toma Guide forums. Download Watch videos from the Internet from YouTube for Android.This is an app that lets you watch videos from the Internet directly to your Android device. YouTube works just like its web version: subscribe to channels, search videos, see recommended videos, share videos and that it also has voice search and instant search suggestions. You can also throw videos on tv, comment on videos, and also loved and disliked them and letting the world know how you feel about said video. Enjoy watching YouTube videos for Android. Check out Tom's Guide for more information android and Android Games.Also check out the forums for Android. Download Android Studio is a prime tool produced by Google to create Android apps. Like many larger modern applications, it is installed through a small installation utility that prompts a full load during the installation process. The browser automatically detects your operating system. Tap the download buttons to manually download another OS-specific version if your automatic version is not accurate. Google To launch Android Studio on Linux, Google recommends the following system specifications: GNOME or KDE desktop64-bit distribution, capable of running 32-bit applicationsGNU C Library (glibc) 2.19 or later4GB of RAM minimum, 8GB of RAM is recommended 2GB of affordable storage space minimum, 4GB Recommended (500MB for IDE and 1.5GB for Android SDK and Image System Emulator)1280 x 800 Minimum Screen Resolution Running Android Studio requires multiple hand-satisfied dependencies. On the 64-bit version of Ubuntu install 32-bit libraries with command: sudo apt install libc6:i386 libncurses5:i386 libstdc-6:i386 lib32z1 libbz2-1.0:i386 On the 64-bit version of Fedora, install 32-bit libraries with a command: sudo yum install zlib.i686 ncurses-libs.i686 bzip2-libs.i686 With these libraries installed, unpack the zip file for the installation of Android Studio. For a user-specific setup, unpack it elsewhere, like /usr/local, or for general users, consider/opt. Start the installation master by performing /android-studio/bin/studio.sh from where you unpacked the SIP. Complete the installation with the graphics installer's tips.
