They have revolutionary Gelcore™ construction that allows you to enjoy high-end sonic performances at an affordable price. The cabinet in an enclosure design binds the inner and outer casings with an adhesive that never quite sets, so the kinetic energy from the drive units must be dispersed as heat. This dramatically reduces resonances and color. Speakers are even better when paired with matching speaker stands that optimize performance thanks to resonant construction. Place them on furniture, bookshelves or even use with appropriate wall mounts. Specifications Bass Unit's Crossover Frequency2.9kHz Dimensions(H/D/W) 10.43 x 11.10 x 6.69 Chassis Type2-Way Reflective Frequency Response(+/- 3 dB): 64Hz - 22kHz Minimum Impedance4 Ohm Nominal Impedance6 Ohm Recommended Power25 - 75w Sensitivity88dB Sold InPairs Treble Unit1 Weight12.35 lbs / 5.6 kg (per speaker) Concept 20 Brochure Concept 20 Manual The beautifully finished, compact and highly affordable Concept 20 is designed for music lovers who want to enjoy performances at their highest quality. Concept 20 changes everything. Their revolutionary 'Gelcore™ Construction' incorporated into their design means, for the very first time, music lovers can enjoy true 'high end' sonic performance at a very affordable price. Concept 20's astonishing ability is best revealed when the speakers are used with the matching Concept 20 Speaker Stands, which to optimize performance boast a Gelcore™ layer in its top plate. This is both visually striking and is resonant-free to optimize audio performance. With the option of either lacquered gloss black, or lacquered gloss white, not only will they sound amazing, but will also look great. Their versatile design means they are also home to furniture, bookshelves or suitable wall fittings. Wherever you decide to place them, they will deliver an amazing experience that many of them with a higher price range are struggling to reach. What is Gelcore™? 'Concept 20' shows that government resonance no longer has to be a problem. Incorporating a 'cabinet in a cabinet' design, its inner and outer cabinets are bound together by a bespoke glue that never quite sets. This configuration (known as Gelcore™ construction) allows the kinetic energy generated by the drive units in the chassis to be dispersed and prevent them from coloring and impairing the speaker's musical output. 'Cabinet in a closet' Gelcore™ construction reduces resonances and color. 'Cabinet in a closet' Gelcore™ construction. Combine this new chassis design with the Concept 20's advanced, high-dynamic, low-distortion drive, and the result is a speaker that is nothing short of sensational at its price. Sensationally.
