Ocean is your prey and you have to keep feeding in this deliciously goofy arcade romp. Rushing from food to food-fish, birds, hapless beachgoers-keeps the pace exhilarating, and gorgeous holiday environments for your eyes. Meanwhile, random hazards (mines, pollution, big sharks) add an exciting sense of danger by reminding you that you are not the only predator in these waters. By far this is the best game I've ever played ! I love all the worlds of skins and in my opinion there is nothing wrong with playing !!! I've been playing for 2 weeks and it hasn't got old fish gems fun to look around and the sharks look awesome! My favorite dark magic shark shark is so cool and I just got it!!! Also, the evolution is an amazing game too and the sharks look so real but so fake at the same time that it's really cool. Thanks for the free mako shark in the world and it has the coolest skin ever vampire very fast and deadly. Also, the games were so much fun and maybe one day you can release a new game of hungry sharks with all the sharks and maybe a couple of new sharks. I think you have to make a flying shark that can breathe all sorts of things like water ice fire etc. Good work on the game and I can't wait for the next update !!! Besides, I had a different idea, you have to make a shark bomb that has a bomb for the head and eats bombs and shoots them at people and helicopters when on a jetpack and it would be so great to see my idea in the game as well as I think the new map is a cool idea, maybe it could be on other planets like Mars and the Moon, which would be great, but I think a dark magic shark or baldr should have a warp powers like a shark. also try to put hungry shark heroes in the App Store I really love this game, I think it's awesome and all you can eat is fun and I'm really good at the game too, but when I got killer whales and even when it got to full level it was tiny. So please make this shark/whale bigger, or at least make it smaller in store because it makes killer whales kinda seem like a rip-off. But despite the fact that this shark/whale is not as intended, I still think it's one of the greatest games I've ever played. (Future) I just got a robo-shark and it's a bit weird. he doesn't eat mine, and when I got exploded alone, I had blood. I think the robo shark should have black oil for his blood, and maybe some gears came out? I also think when he's starving or health critical, he needs to make a beep, like from a hungry shark evolution. I know it may seem like a lot, but I know that the robo shark is the newest, and it may have a few problems, but if you add it all to it, I'll be very happy. And also I read someone else's review and they said that some sharks can't be seen in the wild like robo sharks, basking sharks, zombie sharks, helicopters, and all that. So maybe you can add a new map???? So many updates that I want and so much hard work to make it happen. But if you can make it happen, please, and I appreciate it a lot. Thank you.
