These features work in all image formats, even in animated GIFs and transparent PNG's With the Text Tool GIFs, you can add text to the images. In addition, adding text to animated images is simple and fast. With additional options, you can add a boundary around the text and make the text follow the arc to make it look like text in a circle. With the shadow option, you can add different types of shadows and shades to the text. Join two images or mix multiple images. With opacity settings, you can mix images the way you like the most. It's so simple and fast that running Photoshop takes longer. Add an animated image to a static background or add falling snow to the photo. Your imagination is the limit for creating good dynamic images. Make the image transparent with the Transparency tool. Make the background of the image transparent by simply clicking on the color that needs to be transparent. Or remove the transparency from the image. Place the image in the text, including the shadow and with a transparent background. Who needs Photoshop?! Add rain falling on your image. How wet does it get? You can even send your own fonts to the editor and use them to add to the text. Just select your own source from your device and send it to use it. Stop reading start editing!
