KeyChord Lite is in the Books and Guides category. You can check out all apps from developer KeyChord Lite and find 90 alternative apps for KeyChord Lite on Android. Currently, this app is free. This app can be downloaded on Android 4.2 on APKFab or Google Play. All APK/XAPK files are APKFab.com original and are 100% safe when downloaded quickly. The paid edition of this new version 2.0 was shown on the Android Market and made it into the list of best-selling! Keychord is a dynamic dictionary/reference app for piano chords and weights. Use it to find all the scales and chords! In short: Easy keyboard to look for and play around with all the chords and scales. Many chordtypes and scales to choose from. Also a reverse inspection and the view of the staff. If you're missing something, let me hear it. In detail: KeyChord is built around a visual keyboard that can be used to interact with the chosen chord or scale. You can, for example, press the key to make it the root of the chord or you can long press the chosen chordnote to invert the chord into this position. The same goes for scales. Click on the already selected note for different types of information modes, like note names or intervals. Everything is dynamic, we don't use the database to give you a few predetermined chord spots, but we know how to work and let you choose the chord wherever you want. To add to the dynamic nature of this app, we also included a reverse look, both for chords and scales. It's easy to select the chord notes you keep in mind (or discovered on your piano) and let KeyChord tell you what it's called. It even supports missing notes (like CMaj7 (no 5th)). Sound playback is also included in all modes. The bonus includes a playable piano from Mini Piano Lite (128 sounds and 3 octaves). The perfect companion for learning a fakebook or realbook jazz piano. Features:- 50-ChordTypes- 100 ScaleTypes- Note Names- Component Intervals- Reverse Chord - Scale Lookup, including Partial Chords- Inversions/Slashed chords- Staff View- Favorite and Latest Chordtypes- Hear every chord and scale-recording of midi format songs and use them as a ringtone. Who did not have this kind of hesitation at the time of writing :- Professional, private-essay, essay-SMS-Welcome card, thank you, birthday ... - Letter of motivation and its CVAlthough is generally accepted, especially in the media, that spelling is lost more and more, it is not difficult to maintain a good level of French: practice regularly. It is on this observation that we suggest using your iPhone as a tool for revisions. How to do? For 10 minutes (maximum) you can make one or more dozen vocal dictations. They are divided into three levels: simple, medium, difficult. At the end of each dictation you will be given a score that will allow you to evaluate yourself. Finally, a custom correction will also be proposed. It is important to understand where your mistakes are to be able to progress. The question is: Have you found any guilt in the two previous sentences? Then it's time to train! If not, try to have 20/20 on all dictations and progress significantly and at your own pace Thanks to this unique voice dictation concept, you can combine useful with enjoyable, fun playing while learning. Future dictations will be available to enrich the existing database.
