Hi guys, I've been banging my head with 4 days of thinking how to thank you guys for all your love. It's been crazy for five years. I was stuck at a job I hated doing things I didn't like. I've always had a desire to create, to work on something that I can leave a legacy. App development was just the right tool to fit this urge (to create). Started as a 20-year-old college student studying electronics, who just wanted to experiment and learn, these apps have become my bread and butter now. Every day I wake up feeling grateful, realizing that I'm doing exactly what I wanted to do. The support from you guys motivates me to push harder and make better apps. I promise you, you can expect the highest quality when you download my apps and I would never leave you hanging. email me at any time on kshark.apps@gmail.com for any requests and I would respond within 24 hours. Also, if you're feeling a little generous, please buy pro versions to fund my late night work. The only thing I want is for you to have a great experience when you use my apps. I won't lie, it really feels great when you guys share your love in reviews. You guys, like my extended family, love you! PS : You can always contact me if you can't afford the pro version, I'd be happy to share the promo code with you. Simple and Straight Forward Design - Click Set Once and Forget After installation it will give permanent Superuser or supersu access to all applications without any notifications Use with caution with unreliable applications, Who can abuse root' Works with devices up to Nougat ADDITIONAL FEATURES- Get root check results- Check Installation Busybox- Check if any other superuser app like SuperSU, SuperUser or Kingroot installed- Find a sous binary location- Find the seLinuxNoticePlease status don't install cracks or pirated versions of this app, hackers can manipulate versions, so its incredibly insecure, as the app uses root resolution. It's for your own safety. If you can't afford this just to message me, I'll send you a promo code for the professional version. Twitter : : : God and the free and open source community access for their big and heavy work Attention: You need a rooted Android device to use the app, if you are not entrenched, please do not leave bad reviews, I put my blood and sweat in this. Please email me, I will try to help you eradicate your device, please rate us 5 stars to support our app if you encounter any problems, Feel free to turn to kshark.apps@gmail.com and we will be back to you in 24 hours 108- Fixed policy issues v 107- Oreo and Nougat Support- User Experience Program v 10 2- Major UI Overhaul- Fix Minor bugfixes- compatible with ARM, MIPS and Intel x86 processor- Full Support Nougat 1 2.82-SR1 6.04MB 1 2.82-SR3 6.0 6MB 1 2.82-SR5 6.06MB 1 2.82-SR4 6.06MB 1 2.82-SR2 6.07MB 1 2.82-SR1 6.03MB ADB tool Official Android Updated Device that is rooted TWRP Recovery Download SuperSU APK latest version Make sure the device is connected to the PC if done, follow the following steps.
