2020-07-21 21:26:12 Disabled floor response, Messages have been removed #6 2 Teguh Ramdani from Redmi Note 8 Screen Recorder - a free app for recording and capturing a mobile screen in video format with or without a front-facing camera.★Livestream Games, live shows and more for YouTube, Facebook and Twitch.★ Using a front-facing camera (facecam) will help you capture your own video while you can capture your own video. This option is best suited for recording textbooks of any app. This feature is useful for app developers to record videos to explain the use of their apps. ★ Now draw and create tutorials with board screen.★ This mobile app screen recording feature is useful for users/app testers/testers to explain the problem they face in particular app.★ Screen recording of any app available on your mobile device can be done in real-time application usage mode, like typing any message, recording a video call, watching any video or listening to any audio or anything available on a mobile screen can be recorded.★ This high-quality Android voice recorder can be useful to parents to monitor the use of mobile children using the mobile screen recording.★Draw text on the screen while recording and trimming video with built-in video ★ Screen Recorder HD app does not use any data/internet video as we do not upload recordings to any cloud network or server. All videos are recorded and stored locally on the phone/SD card memory.★ users can create stories telling presentations, videotaping more photos using this screen recorder tool and can upload it to video streaming cloud. ★ App User has the choice to share it via Facebook video, YouTube, email, Bluetooth or any other exchange mode.★ Game users can record their game round while playing with the screen recording video option in our app.★Screen recorder for Youtube video recorders, content creators and App Reviewers/Recorders/Recorders can use this simple free tool to create high-quality HD video and then download your own video recorder. Upload captured videos as Youtube tutorials to your YouTube account. It's free to upload videos to your YouTube account.★ This screen recorder is not a root app uses a video compression algorithm to share to reduce your bill for data and internet usage.★ This is a FREE app with no restrictions to record the screen and capture screenshots of your mobile screen. We allow registrars to choose the Video Resolution Option for Set the video frame rate to be recorded Option in order to set the bit speed option to select orientation as a portrait or landscape video option to choose whether the audio recording is made or not Option to enable or disable the compression of the video★ you can record long long long Without worrying when saving on external memory (SD Card)!★ Home Screen navigation shortcuts make it easy to start recording and capturing screen.★ App marketers and digital marketing can use this tool to create video presentations, tutorials. The front-facing camera can make it really much more interactive.★ mobile screen recording can be done with a front-facing camera feature that allows you to capture your expression for the perfect tutorial.★ This app allows you to record the screen with audio even without a front camera or with your mobile phone's front camera according to your choice. ★ easy and fast access to the recording of control from the notification bar to ensure screen recording quickly and quickly for users. We're here to view your recorded stories about how this app is good for you. You can record and share your feedback from the app support@AppScreenRecorder.comWebsite link: with us on Facebook: on our YouTube channel: Screen recording on Xiaomi Android smartphones is only possible with third-party apps. So, those users who wanted to record the screen of their respective MIUI devices, here we shared a direct download link Screen Recorder APK. The app, called Screen Rec, helps users record screen on high-quality MP4 audio video. It has the ability to turn on the voice or not during the recording process. Users can also share videos on top of social networks like Facebook, Twitter, Youtube and more. Check out the feature below for more information about the app. Note: The app is only compatible with rooted Android phones. So make sure you have root access before installing the screen recording app. Screen res:Shake features to record the start and stop of the screen; Operation one-touch to start and stop recording; choose whether or not to turn on the voice; A variety of sizes for users to choose, up to the original screen size; Share on Facebook, Twitter, Youtube, etc. Screen recorder APKDownload As to install screen recorder APK on Xiaomi Android Smartphones1. First, you need to download the apk file from the above download section to your computer or directly to the SD card.2 device. When you download to your computer, copy the file to the device's storage with the original Mi USB.3 cable. Turn off the device.4. Open the ES File Manager and find the SCREEN Recorder APK file that you copied in the above steps.5 Once found, click on it and follow the instructions on the screen carefully. Once you've been successful, start app by running it out of the app drawer. Let us know how well the screen recording app works for you by commenting below. Like us on Facebook for the latest miUI tips, tricks and tutorials. Could you do you record a video tutorial, video call or video game? Screen Recorder - XRecorder is an app that provides you with the tools you need to do just that. This allows users to make both video captures and screenshots in a static image. Capturing everything that happens on the Screen Android device You can use it to record on video everything you do or play on your mobile phone, including all those videos that can not be uploaded: it would be enough to play on the full screen and it also captures the sound when playing. The cherry on top is that you can even edit them, so you can customize the different recording settings. These are the main features this app has to offer: Capture everything you do or play on your Android video. Supports videos from various apps such as Periscope, Bigo Live, YouTube, Twitch... Export records in different resolutions. Record without watermarks. There's no need for roots. There is no time limit. Countdown to the preparation of the recording. Integrated Video Editing Opportunity to share directly on websites such as YouTube, Facebook, Twitter, IGTV, Instagram...
