Bowser's inside story rom crash

rmcin329 Tag Registered: 2012-11-24 Comment: 20 Okay first I say that I'm running desmume 0.9.10. The system specifications are: CPU, i7-3770 3.4GHz, GPU nvidia GeForce GT 620, RAM 12GB, OS Windows 7 professional 64 bit. The problem I'm running into is getting to the game with Midbus and Bowser. When you enter the battle screen and Fawful tells Midbus what it looks like Bowsers punch the game hangs and just hangs, including sound) Thoughts on that problem? EditTel forgot to mention dynamic recompiler is enabled and the FPS goes 60/60 at the time 60/0 and the 2 %s on the right goes up 99% and 99%, which are usually about 10% in battles. Disabling the dynamic re-translator and retrying it does not help. Last edited by rmcin329 (2014-05-08 19:39:39) zeromus Radical Ninja Registered: 2009-01-05 Comments: 5422 change advanced bus level timing setting as well. also supposedly changing the spu synch / dual mode helps, but I doubt it. Some combination of timing options can help you get past that sticky spot. Garbage about system specifications or performance is not relevant. rmcin329 Tag Registered: 2012-11-24 Comments: 20 Okay, which have advanced bus level timing enabled and dynamic recompiler disabled to work again. (Having both enabled still caused the freeze) thanks for the help, ill's coming back if i run into more issues later. rmcin329 Member Registered: 2012-11-24 Comment: 20 Okay, now you have reached the point where Bowser must fight for his own castle. I can't breathe. The microphone works just fine the Mic test is not a problem. But the game refuses to admit that this is an attack. Thoughts on what to try here? EDITragaded a copy of the file on this topic, You may have crack with it by tapping the hotkey microphone, holding just seems to be net good. Last edited by rmcin329 (2014-05-10 10:16:59) by BilehBawb, May 7, 2020 2,574 11 1 Can not implement that action at this time. You are logged on with another page or window. To update the session, reload it. Okay, the bug report I got is just like this one. I use Desmume 0.9.7svn4172 and every time I try to do the first Bowser vs Midbus fight (near the start of the game when I do not have the fire air), the screen does not properly split, and after Fawful says: I have a big punch!, and I'm pushing past that..... The game freezes with sound repeating. I thought at first it was a question of copy protection, but but but...
