While Friends hits Netflix on January 1st in the U.S. and Canada, the wait may not seem any longer. Chandler would be as impatient as the rest of us. Since 1994, when he began his 10-year run on air, a group of six have captured hearts and held back performance (the greatest understatement - I know). No matter how many re-runs I watch, the show will always be funny. What made friends such a hit was, among other things, the endless sarcasm, and the struggle of being twenty-something in New York. And, since airing, so many books have been inspired by the same themes - some of the best books, actually. This is a good thing for readers, naturally. We can pick up these books now while we're in Netflix purgatory. (Let's be real though, it was supposed to happen while House of Cards was in between seasons, too?) Since countless books have been written about people living in New York, this list scales into those that channel the city and many aspects of twenty-something life, as our favorite friends did 20 years ago. Here are 10 that stand out as ideal for friends fans: COMMENCEMENT BY J. Feeling stuck can be caused by various things: Taking a job for money Staying with an employer that is no longer consistent with your values Realizing that you have landed yourself in the wrong career without feeling valued or feeling under-represented without a full understanding of the role there are many other reasons why you may feel this way, but let's focus instead on exploring that what to do now to get unstuck and get promotedOne of the best ways to get promoted by showing how you value to your organization. Are you making money, saving money, improving the process, or doing some other amazing things? How else could you demonstrate added value? Let's dive right into how to get promoted when you feel stuck in the current current Be a mentor when I supervised the students I used to warm them up - tongue in cheek, of course - about getting really good at their job. Be careful not to get too good at this, or you never get to do anything else. It was my way of pestering them to take on additional problems or think outside the box, but there's definitely some truth in this something so good that your manager doesn't trust anyone to do it. It can make you get stuck. Joe Miller of Be Leaderly shares this insight into when your boss thinks you're too valuable in your current job: Remember a time when you really enjoyed your current role... You have become known to do your job so well that you have created some strong personal equity brand and people know you how to go to the person for that particular job. This is what we call a good problem to have: you have done a very good job of creating a positive perception about your fitness for the role, but you may have done too well the job! With that in mind, how do you prove to your employer that you can add value by being upgraded? From Miller's insight, she talks about creating your personal brand and becomes known for doing a certain job well. So how can you link this work to a position or project that will earn you a promotion? Consider using your strengths and skills. Let's say the project you are doing is so good at recruiting and training new entry level employees. You should post a list of vacancies, read and review resumes, schedule interviews, make hiring decisions, and create training schedules. These tasks require skills such as employee relationships, on-board, HR management, performance management, teamwork, collaboration, customer service, and project management. This is a serious amount of skills! Are there any team members who can perform these skills? Try to delegate and train some of your employees or colleagues to learn your work. There are a number of reasons why this is a good idea: cross-training helps in any situation in case there is a prolonged illness and the chief executor of a particular task for a while. As a mentor for a mentor or colleague, you give them the opportunity to improve their professional skills. You are already starting to demonstrate that value added to your employer by encouraging your team or colleagues to learn your work and creating team players. Now that you have trained others to do this job for which you are so valued, you can see about re-requesting that promotion. Explain how you saved the company's money, called improve your skills or rethink your project2. Working on your mindsetAnother reason you may feel stuck in a position explained through this quote: If you feel stuck at the job you loved, it's usually you, not the job that needs to change. The position you've hired is probably likely exactly the same one you have now. But if you start to fear the routine of work, you're going to focus on the negatives. In this situation, you should continue the conversation with your supervisor and share your thoughts and feelings to help you learn how to get promoted. You can probably get some tips on how to rediscover aspects of the job you liked, and negotiate either some extra responsibilities or a chance to move up. Don't be disappointed. Express a desire for more. Introduce your case and show your boss or manager that you want to be challenged and you want to move up. You want more responsibility in order to keep moving the company forward. Focus on how you can do it with the skills you have and the positive attitude you have cultivated. Improve your soft skills When was the last time you put attention and effort into upping your game with these soft skills? I'm talking about those seemingly intangible things that make you an experienced professional in your specific work skills. According to studies, improved soft skills can improve productivity and retention by 12 per cent and provide a 250 per cent return on investment based on higher productivity and retention. These are just some of the benefits for you and your employer when you want to learn how to get a promotion. You can hone these skills and increase your chances of promotion to leadership by taking courses or seminars. In addition, you don't have to ask for funding from your manager. There are dozens of online courses presented by entrepreneurs and authors on these very topics. Udemy and Creative Live both have online courses at very reasonable prices. And some come with completion certificates for your portfolio! Another way to improve your soft skills is by connecting with an employee in your organization who has a position similar to which you want. Express your desire to move up in the organization, and ask to shadow that person or see if you can sit on some of their meetings. Offer to take this man for coffee and ask what their secret is! Take copious notes and then immerse yourself in the training. The key here is not copying your new mentor. Rather, you want to observe, learn, and then adapt according to your strengths. Developing StrategyDo do you even know exactly why you want to learn how to get a promotion? Do you see a future in this company? Do you have one year, five years or a ten-year plan for your career path? How often do you feel

your why and make sure it fits with your that? Sit down and make an old-fashioned pro and con list. Write down every positive aspect of your work, and then every negative. Which list is longer? Are there any topics? Look at your lists and choose the most interesting pros and the most disappointing cons. Are these two pluses making the cons worth it? Worth? You can't answer that question with yes, then getting a raise in your current organization may not be what you really want. Two of the most important days of your life are the day you were born, and the day you learn why. -Mark Twainher some questions to ask yourself. Why are you doing what you do? What worries you about your current job or career role? What does a great day look like? What does success look and feel like outside of paychecks? How do you want to feel your influence on the world when you retire? These questions would be great to think in a magazine or with your supervisor in your next one-on-one meeting. Or, bring it up with one of your friends working over coffee. Final thoughtsAfter the time of reviewing all these points and doing your best to learn how to get a raise that you can find that stuck is your choice. Then you can put yourself on the path of moving up where you are, or move on to something else. Because sometimes a real promotion finds the purpose of your life.
