CreateToolsExploreLearnPricingJobsLoginTry for freeSign with GoogleSign with FacebookSign with emailTh video editor comes with all the features needed to create great videos - no experience needed. Edit clips of all sizes directly in the browser without the hassle of inconvenient downloads. We even have a quick and simple Facebook Video Ad Maker that you can check out before you head to Stuck for ideas? Browse our library of fully customizable video templates made by professionals tailored to your industry. Avoid blank canvas scares, just change the text and export! We have all the work covered - from videos to your YouTube YouTube promo video. Just browse our extensive template library, click on the template you like, and start! Open a new project and add media to start the editing process. Drag videos, audio, photos and headlines to your timeline and create videos. When you're happy with the editing, export the finished file and save it. Trim the video to remove unwanted parts and reduce the video in their most important sections. Cut longer videos into smaller pieces, remove unwanted parts, and store only what you like. You can also combine multiple clips into one longer video. Flip and mirror videos, including webcam recordings, work both horizontally and vertically. Turn the video clockwise or counterclockwise at 90 and 180 degrees. Trim a video or photo so that only a segment of the original frame appears in the video output. Save the ratio of the sides of the video or the crop to fill the screen. Add to the text, slides and change the font, size and color - text positions anywhere in the video. With our brand features, you can also add your own logo or watermark. Adjust and balance colors by hand, add backgrounds, and adjust opacity on the video's color overlays. Filters give the editing a consistent look. Add transitions and disappears to create the perfect video slideshow. You can export your videos in resolution, which is best suited to your project, including HD for gorgeous clips to use online. The default export option is 480p. You can add your own audio files or choose from our library of audio stocks. We are also working on the possibility of recording voice-overs inside the editor in the near future. It is. We are a source from Storyblocks, with over 100,000 assets to choose from for your online video editing projects. Please see this support article for an updated list of supported video, audio and image formats that you can use in Create. This, depending on what export features and settings you use to create videos. You can easily produce free video without a watermark using free features and export to 480p resolution. Since 2014, we have been developing unique, patented technologies to attract video to the Internet. In this short time, our innovative approach to compression, built-in privacy and browser-based video editing have served millions of people around the world.
