Learn more of simple shapes with these fun activity sheets that also double as coloring pages. More School of Fish, Flamingos, and more critters share a love of reading in these animal seals. More This art sheet is a template for creating your own Mondrian style painting. Image © 2004 by Marion Boddy-Evans. License to About.com, Inc. Color exists only through a different color, the measurement is determined by another dimension, no position other than in opposition to another position. -- Mondrian Create your own version of Mondrian's geometric painting using this measured diagram as a template. Think Of Piet Mondrian, and you think of large paintings with asymmetrical rectangles of basic colors on a grid of strong black lines. It is hard to imagine that he started out as a landscape painter and was influenced by Fauvism, Symbolism and Cubism on the way to his characteristic abstractions. To survive, Mondrian was a porcelain painter for most of his life. Perhaps that explains his hatred of nature. ... (Mondrian) suppressed the curves and all the greenery because they reminded him of the trees he hated. ... In 1924, the artist broke away from Theo van Donsburg, who ... argued that the sloping line on a 45-degree slope was better suited to the dynamism of modern man. (Art of our century, ed Ferrier, page 429.) 429.) You'll need to print out the pattern. Paint in the following colors: black, white, red, blue. You may find it easier to use large and small brushes for large/small areas labeled from 1 to 3. Or a separate brush for flowers from 1 to 3. What you're going to do: Print the template and paint it directly, or use it as a guide to mark the lines on a large sheet of paper or canvas. The black color should be reserved for areas marked 4. Paint in each area in a designated color, taking for care to make sure that your lines are straight and that the colors are not put in the wrong area. Tips: To get perfectly straight lines, use camouflage tape to make sure the paint doesn't drift where it's not needed. Don't forget to buy it in the right width, as it is difficult to cut the length of the tape in half evenly. Tons of free Halloween coloring pages on HelloKids.com organized beautifully in the costume category, scarecrow, dracula, skulls, spiders, haunted castles, ghosts, witches, trick or treat, black cats, and more. You can print out all these Halloween coloring pages or color them online. Halloween Coloring from Hello Kids Continue 17 of the 19 below. Science is usually a topic of high interest for children. Children love to know how and why everything works, and science is part of everything from animals and earthquakes to the human body. Take advantage of your student's passion for science topics by incorporating fun print and practical training activities into your research. It is never too early to start teaching children to document the results of their scientific laboratory. Teach them to make a hypothesis (reasonable assumption) about what they think the result of the experiment will be and why. Then show them how to document the results using forms of scientific reports. Learn about the men and women behind modern science using free sheets such as Albert Einstein's print editions, where students can learn about one of the most famous scientists of all time. Spend some time studying the tools of the scientist's work, such as parts of a microscope. Learn the general scientific principles that people use every day, often without even realizing it, such as how magnets work, the basics of Newton's laws, and the work of simple machines. Earth, space, planets and stars fascinate students of all ages. Exploring life on this planet and in the universe is a topic worth visiting with your students. Students can soar in with astronomy and space exploration printing. Print. weather and natural disasters such as earthquakes or volcanoes. Discuss the types of scientists who study these areas, such as meteorologists, seismologists, volcanologists and geologists. Spend time outdoors, creating your own collection of rocks and indoors to learn about them with stones of print. Children love to learn about creatures they can find in their own backyard. Spring is a great time to explore birds and bees. Learn about lepidopterists who study moths and butterflies, and entomologists who study insects. Plan a tour to the beekeeper or visit the butterfly garden. Visit the zoo and learn about mammals such as elephants (pachyderms) and reptiles such as alligators and crocodiles. If your young students are fascinated by reptiles, print reptile coloring books for them you can have a future paleontologist in your class or homeschool. If so, visit the Natural History Museum so it can learn about dinosaurs. Then, capitalize on this interest with a set of free dinosaur print. While you study animals and insects, discuss how the seasons - spring, summer, autumn and winter - affect them and their habitat. Oceanography is the study of the oceans and the creatures that come of life there. Many of the animals that call the ocean home are very unusual species. Help students learn about the mammals and fish that inhabit the oceans, including dolphins, whales, sharks and seahorses, as well as: CrabsJellyfishManateesOctopusesSea TurtlesStarfish then, dig deeper, exploring more facts about dolphins, seahorses and even lobsters.
