Free 2 lessons are available. 1. Introduction to drawing bar chart 2. Interpretation Bar Charts Both lessons were taught in the year 7 set 6th grade. These lessons refer to a document downloaded about creating frequency tables in another lesson. More FreeReport problem FreeReport problemIt's resource is for UK teachers. See the U.S. version. This free download is brought to you in collaboration with Number Loving and combines two fully differentiated resources covering drawing, reading and interpreting circles. First, this package of six LittleStreams sheets of the first four have the increasing difficulty of drawing circular charts from the tables and two more sheets of increasingly difficult drawing of circuit charts from bar charts. Solutions are provided for each sheet. The second package in this free download is treasure hunt to read and interpret pie charts, it differs from the three levels were the green (hard) level suitable for GCSE Higher. Each level consists of ten questions. Again solutions are provided for teacher references. You can also enjoy SKU: 193 Categories: Foundation, GCSE, Data Processing, Above, Interactive Lessons, Presenting Data, Year 9 Term 1 In this lesson you will learn how to draw and interpret double and multiple bar charts. This lesson includes: videoa several selection of quiz downloadable sheets Created in partnership with GCSEPodBar charts or bar graphics used to visually display discrete data. The bar chart makes it easier for the reader to select information about the data, such as which category has the highest frequency, as well as differences between the frequency of categories. Keep in mind that frequency is the number of times the data value occurs. For example, if six people in your thirty class have a dog, then having a dog as a pet has a frequency of 6.This bar chart shows the preferred genre of the film group of students. From the bar chart it is clear that the most popular type of film among these students is sci-fi. Sometimes it is useful to compare subcategories in the main category. For example, in this bar chart, it might be helpful to look at gender differences in each category or age difference in each category. You can do this with composite bar graphics or multiple/double bar graphics. On the composite chart of the bar or the folded bar schedule, each bar is divided vertically into a subcategory. The key is to clearly show which part of the bar belongs to which subcategory. This composite bar chart shows that of the 10 people who prefer sci-fi movies, 6 were girls and 4 were boys. Another way to display subcategories in a bar is to use multiple bar charts or double bar diagrams, where subcategories are horizontally stacked side by side. However, the key is necessary to clearly show which part of the bar belongs to which subcategory. In this example, several The double bar chart allows you to compare gender differences in each category of movies. You can clearly see that an equal proportion of boys and girls prefer horror. It is important to note that bars should always be the same width, and there should be the same gap between each category. As always, use a ruler and pencil when drawing bar charts and carefully check the scale on the aus. A few or double graphNow bar watch this video from the GCSEPod, which recaps how to present data from the frequency table to the bar chart and then looks at different kinds of bar charts. With a few selection quizzes of aussie information in the video, try answering the following questions with a few options about the bar chart from GCSEPod. You can print out sheets or write answers on a piece of paper. All the answers can be found at the end of the quiz. Double and multiple bar chart worksheetCement your knowledge bar charts by answering questions on this sheet with GCSEPod.Click here to download the answer sheet. Take a look at these other resources around the BBC and online. FreeReport ProblemIt is a resource designed for UK teachers. See the U.S. version.
