Exercise is a key component of having a long and healthy life. See how your body reacts to exercise and learn about specific exercises for different areas of the body. Page 2 You absolutely love your job! It's interesting, useful and complicated. It can also be dangerous to your health. The office space is customized to require little movement, making it easy to gain weight. Before you know it, you've added 50 pounds (22.6 kg) to the frame. Aside from weight gain, table jobs also increase the strain on the back, wrist, eyes and neck, and can lead to overall loss of muscle tone. Advertising stress is another drawback of office work. A yale university survey found that 29 per cent of workers feel pretty or extremely stressed at work. (Source: CDC). This can lead to depression, cardiovascular disease, lack of energy and other health problems. To combat the adverse effects of a 9-to-5 routine, it is important to exercise. But when can you find the time? Workplace workouts can help you make the most of your limited hours. With a bit of creativity, you can take advantage of the few minutes you have between unresolved deadlines and learn to exercise while working. In the interest of your company, squeezing into a small exercise improves concentration and actually makes you more productive. But in case others aren't convinced (or you don't want to be noticeable), here are some exercises you can do secretly. The content of your meeting launch department is a great way to prepare for your work day. It's also a great time to get your muscles ready for office workouts with some areas. Stretch from head to head, starting with the neck. Advertising Slowly tilt your head to your shoulder. Hold on for 10 seconds. Alternative parties. Then loosen your shoulders to get rid of pain, increase flexibility and add strength. Roll both shoulders forward in circular motions. Roll both shoulders back in circular motions. Repeat ten times. Stretch your wrists to get ready to work on your computer. Stretch your hand with your palm down. With your other hand, pull your fingers down. Hold on for three seconds. Then pull up on your fingers. Hold on for three seconds. I repeat, alternating three times. Free up the tired and sluggish feeling you get in your feet with ankles and calf stretches. Keep one foot off the floor with a straight leg. Flex your ankles pointing your fingers up. Expand your ankle by pointing your toes down. Make ten times and repeat with the other leg. Then draw a circle with your feet, moving one foot clockwise and then counterclockwise. On the change of legs. The time it takes to view copies of the spewing out of the copy machine can be quite unproductive. Use these precious minutes with some toe toning

strengthening the exercise. With foot lifts and swings you use the muscles in your leg you move, and use the weight of your body to strengthen the legs you stand on for support. Support. It is better to hold on to the coper for balance. If you hear someone approaching, you can stop quickly. Advertise Lift one foot in the back or side, keeping it straight. Slowly lower it. Changing sides. In the same position bend the right knee. Swing your feet back and forth for 30 seconds. Repeat with your left foot. Glute kicks and calf lifts will stretch your hamstrings and calves. Stand with one leg straight. Try to hit the buttocks with the heel of the other leg. Repeat ten times with each leg. Then lift the heels off the floor. Slowly lower them. Repeat ten times. Your colleagues will see you carefully read the report from yesterday's meeting, but they won't see you strengthening your abs and releasing tired leg muscles. Start with your feet flat on the floor. Sit high at your table. Keep your abdominal muscles tight. Extend one leg until it is at the hip level. Hold on for 10 seconds. Slowly the lower leg. Repeat 15 times. On the change of legs. Chair squats are an effective exercise in strengthening the body. Sneak a few in each time you get up from your chair and sit down. Advertising Stand is high. Stay straight. Lower to one inch of the chair, pretending that you are sitting. Hold on for 10 seconds. Lift back to standing position. You don't need a resistance group to get excellent toning your feet. With straight legs, cross one over the other. Lift them off the floor. Push the top foot down and resist with the bottom foot. Do as long as the muscles do not get tired. Repeat with opposite legs from above and below. It's good for your career to see around the office. These aerobic exercises will help keep your weight down and your profile high. To keep your designs and your body moving, visit colleagues instead of emailing them. Drink plenty of water. Studies show that drinking water can help in your weight loss efforts (source: Jampolis). In addition, the more trips to the toilet, the more calories you will burn. To increase the number of calories, visit the toilet further away from your table. You can also run in some new people along the way. Always walk fast, doesn't work. This will get your heart beating faster and make it look like you have somewhere important to be. Take the stairs whenever possible, not the elevator. For the best workout, take steps two at a time. Advertise Replace the office chair with an exercise ball for all day abdominal toning and strengthening. Sitting on the exercise ball makes you use abs to keep yourself in position. This improves your balance, tones your core muscles and relieves stress from your lower back. Some people even think that it focuses its concentration. Sit on the ball and find your balance. Tighten the navel. Pull your shoulders back (without slouching). Place the thigh legs wide apart. Sitting on a training ball is not easy. Can try it at home to see how long you can last. Advertising While You Help Your Company Increase Your Bottom You can also raise your own. Try these exercises to tighten and strengthen the muscles of the buttocks as well as relieve back pain. Lift one buttock up and almost from a chair. Perform side-by-side swinging motions for 30 seconds. Next, squeeze your gluteal muscles. Hold on for 10 seconds. Release. Although originally intended for dancers, arabesque circle exercises performed while you are talking on the phone can be an effective buttocks and hamstring toner. This is best performed if you have a personal office. Advertising Stand with legs shoulder width apart. Shift the weight on the left leg. Lift your right leg behind you. Hold on to a table or chair for balance. Slowly ent clockwise your left leg 25 times and counterclockwise 25 times. Switch your legs. Who needs weights? A full bottle of water makes an excellent replacement for dumbbells. If someone interrupts, you can just have a drink. Start with biceps curls tone and strengthen your arms. Sit high with your abs pulled out of the inches Hold a water bottle in your right hand and roll it to your shoulder. Repeat 15 times. By changing hands. You can also use a water bottle to make front hand raises and overhead presses. Advertising Hold a bottle of water in your right hand. Bend your elbow. You'll extend your hand over your head. Repeat the other side. Water bottle twists are a great way to work your waistline. Keep a bottle of water at chest level. Twist to the right as far as you can. Twist back to the center. Twist to the left. Repeat 10 times. Just because you sit still during meetings doesn't mean you can't exercise. You can use the conference room table to do a variety of toning and strengthening exercises. First, try to raise the table. Put your hand under the table. Squeeze to the table. Continue until your muscles are tired. Do it with one hand at a time or both together. Then press the table on the floor. Advertise Put your hand on the table, palm down. Push down as hard as you can. Stop when your muscles are tired. You can do it with one hand at a time or both together if it looks more natural. Using a shoulder shrug, answering: I do not know allows you to work in this exercise. Lift the upper part of the shoulders to the ears. Hold on for three to five seconds. Relax. You will seem attentive, exercising your whole body with this step. Sit on the edge of the chair. Tap the table with both hands. At the same time lift your legs as high as you can. Isometric exercises are also sometimes called static strength training. In the absence of visible joint movement, these exercises can be performed undetected. If you spend a lot of time on your computer, hand squeezes will offer some relief to your fingers. You can do it with or without the stress of the ball. Advertising Make a fist. Squeeze.Hold and let go. Stretch your fingers. Strengthen your calves and ankles while reading, listening to the web cast or talking on the phone. Stand up and hold on to the chair. Rest with your left foot on the back of the Calif. Get on your feet. Hold on for 20-30 seconds. Repeat three times. On the change of legs. Kegel exercises help prevent or control urinary incontinence by strengthening pelvic floor muscles. You can do them discreetly while performing any routine task. Contract pelvic floor muscles. Hold on for five seconds. Relax.Repeat five times, three times a day. You can use this squeeze, hold and release technique to strengthen almost any muscle. Sometimes the best way to burn calories is not by exercising at all. Below are a few non-exercise ways to shed some weight. Stand up when you can. You'll burn more calories than sit, more than 50 more per hour for a 155-pound person (source: Platkin). Fidget can burn an extra 350 calories a day. Fast tapping his feet, talking with his hands and chewing gum, all counted. While calorie burning for each movement is minimal, fidgeting can add up to a loss of up to 36 pounds (16.3 kg) per year (source: Platkin). Good posture is an effective measure of strengthening the nucleus. This requires you to use muscles to keep your stomach tight and your back straight. Do this constantly to build abdominal strength, relieve lower back pain and help you feel more confident. Deep breathing helps to relax and reduces heart rate. Breathe through your nose and through your mouth. Laugh often. It tightens your abdominal muscles, exercises your diaphragm, works your heart, relieves stress and gives you a better outlook on life. By making exercise part of your daily work routine, you will be healthier, happier and more productive. But let's keep it a secret. Is exercise at work widely accepted?
