Metric lists to facilitate navigational metrics grouped by category: Blog Demos Internet demo access system on request focused.solutions@sap.com How to check technical monitoring sources (Wiki /Jam) What to check on monitoring patterns (Wiki /Jam) Where to find what to set up to get security values (Tactical/OCC) (Vicky/Jam) is a very pre-configured solution based on sap solution. In addition to automated workflows and task readiness panels, the focused solution also provides supporting materials and documents to facilitate deployment to project team members. Focused Build for SAP Solution Manager provides a non-standard and integrated methodology for supporting requirements management and software development tools in large, flexible innovative projects such as SAP S/4 HANA implementations. Focused Insights provides real-time and historical ideas to the company with a new dashboard structure. Create and distribute powerful dashboards to specific customers in a few minutes using the best user interface. Using prepackaged content and more than 800 of the best key performance indicators pre-selected for standard usage cases. Focused Run is a targeted solution for SAP Solution Manager that targets service providers and individual customers with advanced needs. It's an isolated installation that can work side by side with the existing SAP Solution Manager. Focused Run focuses on application operations and is optimized for SAP HANA. This reduces the technical footprint and the associated total cost of ownership (TCO). The scalability, performance and bandwidth of the data have improved significantly, and CoreALM prides itself on being one of the first sap companies to invest and support focus solutions. Contact us to find out more and guide you on choosing the right Focused Solution components for your needs.
